Finley and his Movies at the Club, Thursday

"Where Rolls the Oregon," New Lecture by Famed Naturalist, Unrolls the Romantic Story of the Country Explored by Lewis and Clark

William L. (Bill) Finley returns to the Club to give his new lecture Thursday night this week. "Where Rolls the Oregon" is his new theme, and deals with territory around the Columbia River. Finley has been a favorite to

Finley lives in Portland, Oregon, and comes East each year. If you have never heard him nor seen his pictures, we urge you to come to the Club Thursday night. You will be well repaid. Lecture at 7:45. Organ concert by Edith Lang at 7:15.

WILLIAM L. FINLEY

City Club audiences for many years, and has delivered all of his lectures before our members, after cruising and exploring from the Gulf of Mexico to the outpost islands of the Bering Sea.

FINLEY PICTURES MEAN SUPERB PICTURES

The patience of a naturalist who loves to watch in the woods, the technique of a camera man who knows the artistry of lights and shadows, always combine in making the Finley motion pictures informative and entertaining.

Indians still spear salmon at the falls of the Columbia, coyotes stalk sage hens and pronghorns on the open plateaus, eagles and hawks live a pirate's life among the crags, and the remaining undrained marshes are the homes of myriads of ducks, geese, grebes, herons, gulls, pelicans, stilts, ibis, avocets, curlews, sandhill cranes, and many others.

The Boston City Club Players

The birth of the B. C. C. Players is announced. A small group of members interested in stage productions met with the Civic Secretary last Tuesday night and discussed the possibility of the development of a group of members similarly interested, to the end that drama and musical shows may be put on in the Auditorium, produced and directed by our members.

The organization of such a group was deferred for two weeks in order that there might be a larger group present when officers are elected and a general plan agreed upon. It is believed that there are a great many of our members who will delight in participating in such a new Club activity, and it is earnestly urged that they be present at the next meeting—Tuesday, February 19th, Civic Secretary's Office at 7 o'clock. This call is sent out over the signatures of Harlow C. Seeley, Henry Irving Dale, N. W. Lillie, Ernest W. Bean and A. H. Davis.

Levon West's Water Colors and Etchings

Through the courtesy of Doll & Richards, there will be a showing of water colors and etchings by Levon West in the Art Gallery for two weeks, beginning today. Mr. West was a pupil of Joseph Pennell's and made his fame as an etcher widespread by "scooping" his competitors with a portrait of Lindbergh after the Paris flight. He is said to have been working with water colors for only two years. He is from South Dakota, and is at his best in his views of action on the Western plains. His pictures hang in the Philadelphia Museum, the New York Public Library, the Metropolitan Museum, New York, and the Brooklyn Museum, and our Museum of Fine Arts.

The "Under 40" Group Gets Going

Aided and encouraged by a number of the long-time members of the Club, including President Arthur Hardy, the "Youth Movement" got under way last Monday night. Following a tasty buffet supper and a period of "close harmony" around the piano, Fred Mann called the meeting to order, and introduced chairmen or representatives of the activity com-
