**THE COVER.** Russ Lawrence, '70, Lebanon, is on his way up this large McDonald Forest fir during the Forestry Club's annual "Spring Thaw." Lawrence was chairman of the event this spring. Skills of the men of the big timber are known to OSU foresters, as the Spring Thaw photos on pages 16 and 17 illustrate. Spring Thaw photography was by Bill Huhta, '70, Astoria, a member of the Department of Journalism's photo-journalism class.

# Campus news and comment

## Stater features forestry

From time to time, *Oregon Stater* will feature a particular school within the University. This issue has several articles related to the School of Forestry.

It is impossible, of course, to tell the entire story of the School of Forestry in the space available in an issue of the magazine. Neither is the intent here to duplicate any of the excellent material available to prospective students and interested employers from the school.

The School of Forestry is a very interesting, somewhat unique part of the university. There is a "laboratory" in the form of 11,000 acres of forest land a few miles from the campus. It has its own Forest Research Laboratory on Western Boulevard, southwest of Parker Stadium, where some of the most significant forest research in the world is conducted. It has a remarkable self-teaching center where over 600 tape-slide and other teaching presentations are available to students.

There are many other significant aspects of the School of Forestry, not the least of which are its close ties with the state's No. 1 industry, our environment and its own alumni. The school is a worthwhile visit for alumni and friends from any field of endeavor.

## Board praises Acting President Young

The Board of Directors of the University Alumni Association, in its annual meeting on the campus in May, formally extended to Dr. Roy A. Young "compliments and sincere appreciation" and his service as acting president of the university during the past year.

Young was appointed acting president a year ago following the resignation of Dr. James H. Jensen. Dr. Robert MacVicar, currently the chancellor of Southern Illinois University, will become president July 1.

Donald E. Johnson of Corvallis, president of the Alumni Association, said the board knew the demanding responsibilities and obligations of the office of OSU president, particularly in the past year, and felt Dr. Young could be proud of the contributions he has made in the advancement of OSU.

Young discussed with the board the events of the Moratorium on Violence week early in May.

He said that OSU students deserved the highest praise for the conduct during the week, a week of student protest throughout the country.

### Day "extremely rewarding"

He acknowledged that many students, faculty and alumni had opposed the cancellation of classes on the Friday and many more had misgivings as to what the result would be. He said, however, that the day had been extremely rewarding and that many of those previously opposed or not involved had contacted his office to express their approval of activities and the conduct of students.

Many students spent the time in meetings with faculty in schools and departments and more than 40 other discussion groups concerning the national events which brought on the protest. Faculty from all disciplines, including ROTC

Roy A. Young

officers, shared points of view in various meetings.

It was the first meeting of this nature for some schools and departments and several of them announced they will hold more meetings in the future to discuss problems of deep concern to students. He said many new lines of communication had been opened.

He complimented new Student Body President Doug Sweet, other student leaders and many of the faculty for helping to make it a meaningful occasion. Young and the leaders had emphasized that everyone should devote "at least equal time to listening."

### Board elects officers

In other business, the board re-nominated and approved its officers for another year.

They are Donald E. Johnson, '36, president, and Terry B. Elder, '47, treasurer, both of Corvallis; Richard G. Farnes, '54, first vice president, Portland, and Mrs. John H. Hann, '42, second vice president, Salem.

Seven board members were re-nominated and elected. They are:

Mrs. Eleanor Chown, '40, and Rudy H. Thielemann, '34, both representing OSU alumni district 1, Portland; Richard J. Nelson, '51, district 2, Astoria; Harvey Watt, '50,

(Continued on page 12)

### Yearbook acclaimed; sales up

The 1970 *Beaver* is off the press and drawing excellent comments from students, faculty and parents. Editor Ralph Thrift, '70, of Coos Bay, and his staff did an excellent job of blending the traditional in yearbook content and the modern in appearance.

Irwin Harris, '41, *Beaver* advisor, reported a record sale of 8,300 books.

# State challenge—more from less

*OSU alumni help...*

By **KEN DUBBIN**

*Oregon Forestry Dept. Writer*

For the Oregon State Forestry Department, today is a time of great challenge. Foresters are faced with the demand for more building materials to supply the needs of an ever-growing population, and they are asked to accomplish this from a forest land base which shrinks each year.

Along with the cry for more production is heard the equally pressing demands for a cleaner environment and more recreation areas.

Helping to satisfy these many needs in a way that will benefit all Oregonians is the challenge which faces State Forester **J. E. Schroeder, '47**, his deputy **Frank Sargent, '46**, and his staff of more than 100 foresters.

In order to be more responsive to the people throughout the state, the land administered by the department was divided several years ago into four distinctly different administrative Areas, each under a Director.

## State divided into four large areas

**William Holtsclaw, '49**, is in charge of the nearly 5 million acre Eastern Oregon Area. Fire is one of his major concerns during the long, dry summers.

In Clatsop and Tillamook Counties, forest management is one of the major jobs of the Northwest Area Director **Marvin Helland, '39**. The rapidly growing Tillamook Forest is found in his balliwick.

Willamette Area Director **Ronald Smith, '52**, supervises fire protection on nearly 3.3 million acres of mostly private-owned forest land. Some of this is state-owned where intensive forest management is practiced.

Southern Oregon Area Director **Carl Smith, '52**, and his assistant **Darrel Ray, '61**, have some of the major problems of all the other Areas, plus a few of their own. One of the foremost is the fire protection difficulties presented by a heavily subdivided rural area with the hot, dry summers common to southern Oregon.

These men and the personnel of the districts within each Area help the department to key its programs to local needs.

*State Forester J. E. Schroeder, '47, (seated) and Deputy State Forester Frank Sargent, '46.*

Protection of the forests from fire remains one of the department's major functions. About half the forest land in Oregon, some 15 million acres, is given direct protection by the State Forestry Department and affiliated Forest Protective Associations.

## Computer provides fire danger data

The Fire Control Division under Assistant State Forester **Ted Maul, '48**, has seen a lot of change and modernization in the past few years. A fire danger rating system was developed and put into use several years ago which takes a lot of the guesswork out of fire danger evaluation.

It uses a computer to figure daily burning indices. The system analyzes weather and fuel conditions in 45 separate weather zones throughout the state, and yields accurate and rapid analysis of both current and predicted fire danger for each zone.

Data gathered from weather stations in each zone is sent through a teletype network to the Salem fire weather office where the Burning Index (BI) on a numerical scale of 1 to 100 is computed.

Fire control personnel in the field offices then use of the BI in deciding when to implement closures and logging operation shutdowns. They also use the BI in deciding what their manpower and equip-

ment requirements should be at any given time. Last year a contingency plan was put into effect whereby men and equipment could be moved from an area of low BI to an area approaching a high BI, to be ready for fires which studies have shown will generally occur at certain BI levels.

The Studies and Development Section headed by **Neil Skill, '53**, evaluates the effectiveness of these various programs and also devotes a lot of time to the development of improved and new fire control equipment. Their work helps make initial attack on fires both quicker and more effective.

### **Plastic buckets, wings, wireless fight fire**

One very successful development was a fiber-glass bucket designed to be carried slung from a helicopter with a gate release control operated by the pilot. The buckets drop either water or chemical fire retardant and can be filled from a tank, river or pond while hovering. They have proven very effective on small fires and for cooling hot spots on larger fires. They are used to slow fires and buy time for ground forces.

Aircraft in general have become vital to the fire control effort. The department owns two, a single-engine Cessna and a two-engine Beechcraft acquired through the government surplus program. Both are used on fires, the Beech to haul men and equipment, and the Cessna frequently for scouting as well as personnel transport. Helicopters have often been contracted on large fires or at times of high fire danger when their versatility makes them a real asset.

Radios have become as essential in fighting fires as water. The Department Radio Section headed by

*Fire control is one of the prime functions of the State Forestry Department. Modern equipment developments such as this fiber-glass, helicopter mounted bucket have made initial action on fires both quicker and more effective.*

*The bucket shown here can hold up to 140 gallons of water or chemical fire retardant and can be filled simply by lowering into a tank or pond without need for landing. Retardant drops help slow small fires and cool hot spots. They buy time for ground forces.*

William Sanders has pioneered in the development of radios for fire control use and other electronic equipment. They recently developed equipment used for training fire control people under realistic but simulated fire conditions.

Concern for air quality prompted a smoke management plan which went into effect last year in western Oregon. It was developed by Fire Prevention Director **John Langrell '58**, the Salem Fire Weather

Fire Control Division

## *"The forest land base shrinks . . . yet our need . . . increases."*

Section, and other fire control experts.

Basically, under the plan, slash burning is not permitted except when prevailing winds will carry smoke away from populated areas, or when atmospheric conditions are such that smoke rises to disperse at high altitudes. The plan was coordinated by the State Forester and involved other forest agencies and the private timber industry. After one season of use, it appears the plan will work well. Almost no complaints were received by any of the agencies about slash smoke last year. Burning decisions are based on weather advisories put out each day by the Salem Fire Weather Office.

Foresters have not yet found a practical substitute for slash burning following logging. This is needed to reduce the fire hazard and prepare the site for a new forest. The volume of slash becomes less each year, however, as logging is done more and more in second growth timber instead of large-limbed old growth. Further, improvements in utilization now mean more of the tree is removed from the woods for use.

### **More timber needed from less land**

The challenge of producing more timber on less land is the direct concern of Assistant State Forester **Vance Morrison, '39**, who heads the Land Management Division. This must be done so that other resources and the total environmental quality are not damaged.

The forest land base shrinks each year as land is put to other uses—highways, reservoirs, subdivision for home building—yet our need for wood fiber increases with the population expansion. The solution has to be more growth on the land available.

Foresters are finding many ways to do this. The

first step, of course, is getting all the land into production.

Farm Forestry Director **Charles Ladd, '32**, and a crew of farm and service foresters encourage small private landowners to grow trees commercially on their lands by offering free technical assistance. About half of Oregon's private timberland is on ownerships of this type.

Conservation Director **Jack Hann, '42**, directs a program aimed toward getting all state-owned timber lands into maximum production. This is a major task involving some 787,000 acres of land.

Seedlings come from a state tree nursery near Elkton. Nursery Superintendent **Lyle Baker, (MS), '41**, directs operations on the 100-acre property. Last year the nursery raised 4.7 million seedlings for planting on state lands, 9.2 million under contract from other agencies, and 4.8 million for sale at cost to the public.

### **Better trees for the future**

A genetic tree improvement program is now underway to help provide better trees for planting in the future. Seed has been gathered from trees having desirable characteristics and planted in nursery beds. The best of the parent trees will be selected for future seed source based on the growth rate and other characteristics of the seedlings.

In some cases an overpopulation of trees creates such competition for food, water and sunlight that growth comes almost to a standstill. Thinning in young stands and partial cutting are some of the forester's most effective tools for maximizing timber production. By removing some trees from the stand, you not only have the wood from the removed trees,

# School of Forestry leads the way

Oregon State University has one of the largest and most highly regarded schools of forestry in the nation and the school illustrates the many changes taking place at OSU.

The latest major development for the School of Forestry began last summer when ground was broken for OSU's new \$2,365,000 forestry building, to be named Peavy Hall after the former dean of the School of Forestry and president of OSU, George W. Peavy. It is scheduled for completion in April, 1971.

With over 84,000 square feet in its two floors and basement, the structure will be about three times as large as the present building, which was opened in 1917. The site is the southwest corner of Jefferson street and the Mall. This is northwest of Parker Stadium, about two blocks beyond the football practice field.

Significantly, the building will be adjacent to the United States Forest Service's Forestry Sciences Laboratory. These units, along with the school's Forest Research Laboratory on Western Boulevard and the Forest Insect Laboratory will give OSU the most complete school of forestry in the country.

Dr. Carl Stoltenberg, completing his fourth year as dean of forestry at OSU, said the new building will be primarily of wood construction, employing glue-laminated wood columns and beams. Funds for the construction came from general obligation bonds authorized by the voters in 1968 and a \$416,000 federal grant.

The building is being planned to accommodate 700 undergraduate and graduate enrollment as compared to about 500 this year. Pres-

ently, OSU forestry students come from 19 states and 9 foreign countries.

Nearly 2,500 have graduated from the OSU School of Forestry. The graduates are employed in 46 states and 24 foreign countries.

To educate men as professional foresters, the School of Forestry offers three major fields of study: forest engineering, forest products and forest management. In addition to the standard forest management program, an option is provided in forest science for students who are research oriented. Also, a forest recreation option is available.

OSU forestry students are aided greatly by a unique 11,000 acre forest laboratory only seven miles from the campus. This area is made up of the McDonald and Dunn Forests and Peavy Arboretum.

The School of Forestry assists in placing students in summer jobs related to forestry. Satisfactory performances on these jobs is considered important by the school and frequently the jobs prove very bene-

Dean Carl H. Stoltenberg

ficial to the graduate's professional career.

The school also has a unique self-learning center. Focal point of the center is the self-learning lab. Here students, on their own, watch individual presentations of slides and films, and listen to explanatory tape recordings as they examine related wood products and other specimens.

The center also provides forestry instructors with audio-visual materials for classroom presentations.

Opportunities for the forestry graduate have greatly expanded in the past few years. Increasing numbers are finding excellent opportunities in private forestry and with forest products industries as well as with the public agencies. Research also offers many careers today.

Dean Stoltenberg participated in the "Environmental Impacts" panel of the 5th Annual Alumni Seminar. The Seminar, which was held late in May, had forestry as its topic this year. The day-and-a-half session included a tour of the Weyerhaeuser Company plant in Springfield, a tour of McDonald Forest and lectures and panel discussions featuring most of the OSU forestry faculty. Those attending had strong praise for the Seminar, especially the participation, cooperation and courtesy of the School of Forestry faculty.

# 38th Annual Fernhopper Day

Forestry Alumni Association officers talk it over outside the MU. From left, Jim Bagley, '50, Eugene, outgoing president; Carwin Woolley, '42, Portland, vice president elect; Clyde Stratton, '47, Portland, president-elect, and Rudy Kallander, '40, OSU, secretary-treasurer.

Each February since 1929, with the exception of several World War II years, many OSU School of Forestry alumni have returned to the campus for Fernhopper Day.

They do so to see the campus and each other again and also to learn what they can do as professional foresters to help the School of Forestry students and its faculty.

Over 200 alumni and others of the forest products industry joined students and faculty for the day this year.

Student Ken Kramer, '71, explains a project to Harry N. Roundstell, '28, of Boring and Leroy A. Hawkins, '26, Salem.

Fernhoppers board a bus for a tour of McDonald Forest. Over 200 alumni and others of the forest industry joined the students and faculty for the day.

Dean Carl Stoltenberg addresses a luncheon meeting of the association. The dean thanked the alumni for their help and outlined priority needs of the school.

The semi-annual meeting of the Council of the Columbia River Section of the Society of American Foresters was held in conjunction with Fernhopper Day. At right, the group's chairman, Ron E. Smith, '52, heads the meeting. Officers of the Council, above, seated left to right, J. E. Schroeder, '47, national councilman; Chairman Smith; S. T. (Tenny) Moore, '45, treasurer, and standing, Jack Hann, '42, secretary, and Joe Bergman, University of Washington alumnus, endowment fund chairman and member at large.

One of the highlights of the 38th Fernhopper Day was a special panel which discussed "Where is Professional Forestry Heading?" From left, student Bruce Palmer, Corvallis; Oscar Weed, '46, region manager of Weyerhaeuser Co. for Southern Washington and Northern Oregon, Longview, Wash.; student John Garland, Associated Students Forestry senator and panel moderator; Manuel (Slim) Schrager, '51, manager of Crown

Zellerbach Corp., Clackamas Div., Molalla; J. E. (Ed) Schroeder, '47, State Forester of Oregon, Salem, and student Jeff Blackwood, Continental Divide, N.M. While Fernhopper Day is a very enjoyable get-together, more significantly it is an opportunity for students and faculty to formally and informally discuss the profession's changing needs with men in industry and the government agencies.

Loran L. Stewart, '32, president of Bohemia Lumber Co., Inc., is one of the leaders of the timber products industry. Currently, he is president of the National Forest Products Assoc. He has held the presidency of the Western Wood Products Assoc., the Timber Operators Council, and the Association of Oregon Industries. He is a member of the Society of American Foresters and of the U. S. Department of Commerce Softwood Lumber and Plywood Advisory Committee.

He was a State Representative from Lane County in the 1951, 1953 and 1955 Oregon Legislatures. He has been chairman of the State Parks and Recreation Advisory Committee since 1960 and recently was appointed by Gov. Tom McCall to the State Board of Higher Education. He is a member of the Board of Trustees of the OSU Foundation and the Board of Directors of Sacred Heart Medical Center Foundation, Eugene. He is a past Chief White Tail of the Order of the Antelope.

Stewart left the U. S. Forest Service in 1942 to join the Army Field Artillery. He served four years and achieved the rank of Lieutenant Colonel. Much of his duty was in Asia and, in addition to earning the U. S. Bronze Medal, he was decorated by the Republic of China with the Grand Star of China. The Stewarts have two boys, Steven K., now in the Navy, and L. M. (Bud), an administrative trainee at Bohemia.

# Row River Valley's Stewart sees bright future for foresters

By **CHUCK BOICE**

Editor

**T**he forest products industry is Oregon's No. 1 industry and it will be for many years to come."

Loran L. (Stub) Stewart, '32, is known as a man who will come right to the point, and he was doing just that in terms of the forest products industry.

Oregon has changed. One is not so conscious of the mills, loggers and log trucks anymore. And much of the industry is so diversified today—paper products, plywood, particleboard and many other products—that it is not always recognized.

But it remains No. 1.

Obviously, there is more to it than economic reality for timber products leader Stewart. There's an affection of one who grew up in the big timber country of Eastern Lane county and includes in his background more Lane towns than Cottage Grove and Eugene. There is also Fall Creek, Wendling, Nesmith, Rocky Point, Rujada and some others.

If some of these Row River Valley localities aren't well-known to the general public, the Row River Valley and Culp Creek are well-known in the timber industry because this is where Bohemia Lumber Co. is located.

## **"Bohemia," a miner on the lam**

While the company has a very attractive, spacious office building in Eugene, the usual address is Bohemia Lumber Co., Inc., Culp Creek, Oregon. The name Bohemia goes back more than a century to when a wandering miner named James "Bohemia" Johnson, hiding from Roseburg law in the spring of 1863, made a gold strike high up in the Cascades southeast of Cottage Grove.

The Bohemia Lumber Co. was founded in the area and Loran and his brother, Faye, and brother-in-law, Larry Chapman, naturally kept the historical name when they gained control of the mill shortly after World War II.

Some other states may exceed Oregon in natural wealth with resources such as oil or minerals.

"But this (timber) is a *renewable* resource," Stewart emphasized. "If we manage it properly, it can last indefinitely.

"Furthermore, this is a resource that is part of our recreation and part of our beauty here in the Northwest."

Stewart feels he can offer personal testimony that timber is renewable as a resource.

"There are some Lane county areas that I remember being logged and then they were burned over completely. Recently, we've been logging those areas again—and I'm not all that old. In a Douglas Fir region so much depends on the site—the type of soil and that sort of thing. There may be a good stand of new timber in 40 years, or it may take 100 years."

### **A great fire in the early 1800's**

As do many in forestry, Stewart believes the general public lacks knowledge about our forests. He waved a hand across a map of Southwestern Oregon and indicated a huge area of timber from the Siuslaw River west of Eugene to Lakeside north of Coos Bay. The commercial air route is over a portion of this area and reveals to flight passengers many miles of "original" timber.

"Most of that timber is only 130-140 years old," Stewart explained. "Except for a few, small pockets, that entire region was leveled by a great fire in the early part of the last century. This has been the history of the timber and, unless we harvest it, nature will repeat the process. It will destroy those stands one way or another and then try to regrow them or some other vegetation.

Stewart, who was with the U. S. Forest Service for several years after his graduation, thinks man has demonstrated he can duplicate and aid nature in regrowing timber.

"If you use nature to help, you can do the job," he said. "In fact, we should be able to improve on nature a little bit. We grow much better corn and wheat now than would grow naturally. We can do the same with timber through the research being conducted at OSU and by private companies."

### **More waste products being used**

Stewart sees exciting years ahead for the timber products industry.

"I really believe that within five years we'll be extracting chemicals from bark and using the residue as extenders for agricultural and other uses. That will mean another waste product will become a useful material.

"We're now using more and more sawdust in pulp production and elsewhere. The new American Can Co. plant at Halsey now produces pulp using half sawdust and half chips. More and more plants will do this. Just look around and see all the wigwam burners that aren't burning anything."

He sees the sale of chips, "the big thing of the past five years in the industry," continuing to climb in the years to come.

As is the case with other professional foresters, Stewart does not find an interest in environment and ecology to be very new. Fortunately, the forester has known this important concern for many years in work with the forests, land and streams.

### **Students pay Earth Day visit**

Stewart was very pleased that students were able to visit the Bohemia operation during Earth Day this spring. They saw what was being done to preserve the resource and preserve the environment.

But the several busloads of students represent only a tiny fraction of the Oregonians who should have a first-hand look at an everyday logging and lumbering operation.

Stewart wears another important hat in this regard. Since 1960 he has been chairman of the State Parks and Recreation Advisory Committee. In this

Construction is underway on the \$2,265,000 forestry building, to be named Peavy Hall. Scheduled for completion in late spring, 1971, it will be one of the nation's best equipped forestry cen-

ters. The structure, which will accommodate 700 undergraduate and graduate forestry students, will be primarily of wood construction, employing glue-laminated wood columns and beams.

capacity he is concerned with many aspects of the environment in the state.

In some areas he has been pleased with the progress.

"On some rivers we've been doing a good job for quite awhile. Forty years ago, you couldn't find a sewage treatment plant on the Willamette River. Today, there's not a city without one. And the sawmill burners are coming down. We've seen that much can be done."

While Stewart expresses some optimism because we know how to combat certain areas of pollution and have been applying pressure, there are other areas which rankle him.

### **Wants the shacks down**

Mostly these are the solid waste problems—the beer cans, the old automobiles, the junk—and particularly, the eyesores along the highway.

"A person would be astounded to learn how many old, unoccupied shacks, barns and sawmills there are along the roads and highways. Certainly, I am in favor of protecting private property as much as anyone. However, I think we have to find out who owns the property where these shacks are and insist the shacks come down."

Stewart is very proud of the way the OSU School of Forestry has been able to respond to its alumni and the industry as well as its students. This will continue to be very important in the future.

"The summer work helps. The student relates the industry and the university as the result of his summer work . . . And the School of Forestry keeps in touch. Dean Stoltenberg will ask industry leaders, 'What are we doing wrong? What are your needs?' There's always been a rapport with industry. This is tremendous . . . And there is Fernhopper Day each year when the alums come back and see the school, see each other, and talk things over with the faculty.

"This closeness with each other in later life and with the University has meant a great deal to me and I'm sure to most of us."

### **Dean liked stout coffee**

The School of Forestry in those early depression years also gave the students a social club.

"There were those times at the arboretum," Stewart recalled. "Dean Peavy would cook the steak. You had to watch the coffee, though. He'd put in an extra pound 'for the pot,' if you weren't watching.

"Men like Dean Peavy and Harry Patterson, the head of logging engineering, were right out amongst them. I understand they're naming the new building after Dean Peavy. That's very appropriate.

"We've been blessed with outstanding deans and many dedicated faculty. That's a lot of it."

*Few foresters in the world know the world better than Fred H. Vogel, '37. He is seen here, at left, along with, at right, Nguyen Van Trang, '59; Nguyen Van Hy, '64 and also a forestry graduate, and Mrs. Van Hy at an American University Day at the Vietnamese-American Association in Saigon, South Vietnam, last winter.*

*Shortly after this occasion, Vogel completed a 27-month assignment in Vietnam as Agriculture Advisor (including forestry) and Administrative Officer for the Agriculture Division of the U. S. Agency for International Development and later with the foreign work detail at the American Embassy, Saigon. He has returned to Washington, D.C., to retire from government service.*

*Vogel has had regular advisor assignments in Honduras, Paraguay, Nepal, Turkey, India, Afghanistan and Vietnam plus short work details to Panama, Peru, Chile, Argentina, Brazil, Bolivia, Costa Rica, Venezuela, Iran, and East and West Pakistan. In all, he has visited forests in 80 countries, including all of the Communist nations except Red China and Albania. "This I do know," Vogel said in a letter to the School of Forestry, "I prefer the USA to any other country."*

*Vogel said he does not intend to sit idle and pine away. That certainly is evident from this statement: "My first concern after retirement is to pass the federal exams for marine commercial radio operator, then to try for a Ph.D. I'm already working on the manuscript for a new international dictionary, of acronyms, initialisms, alphabetical symbols and abbreviations used in foreign service. Then I hope to build a house with my own hands, to plant and manage at least a Christmas tree project and to dabble in the stock market."*

The editors wish to thank the many who helped with identifications on this OSU Archives photo.

## Enrollment ceiling being discussed

The thought of eventual enrollment ceilings for OSU comes as a mild shock to those still trying to adjust to the size of today's 15,000-student campus.

But ceilings are being discussed.

This is not the same as the temporary limitation imposed for the fall of 1970 (*Oregon Stater*, Winter 1970). This is an ultimate ceiling, a figure beyond which the university would never go. Figures mentioned recently were in the neighborhood of 19,000.

OSU only recently gained the stature that goes with 100 years and has the feel of keeping pace as a major university. Growth—up to this point—has not been too painful at OSU.

Now somebody wants to stop it all before long. The first feeling is a worry about being stopped short of potential.

### By 1980—possibly 35,000!

But members of the State Board of Higher Education and other leaders in education are talking of permanent enrollment ceilings and probably the talks are not premature. OSU has doubled its enrollment in the past 10 years. An increase of 10 percent a year, not an unrealistic growth rate, would mean that OSU would start the next decade, the '80s, with an enrollment in excess of 35,000!

In other words, OSU can match today's "multiversity" size of the Big Ten schools and the largest of the Coast schools in a relatively few years. In fact, it no doubt will unless some limit is imposed.

The University of California has established a ceiling of about 28,000 for its many campuses and opened several new branches. The University of Washington last year suddenly put on the brakes at 32,500. A new four-year college near Olympia is being opened. In

*The MU Quad is no longer sacred ground. In the beautiful weather of spring, students may lounge or study on the expanse of grass without fear that a Thane or representative of some other group will apply "keep off the grass" pressure.*

*In today's enrollment explosion, the change appears permanent and many oldtimers have decided they like the looks of a colorful, living Quad better. Space is the big factor. The enrollment has more than tripled in the past 30 years to over 15,000. Meanwhile, the actual campus core free space has diminished greatly as new, large buildings and parking areas have been constructed near the core.*

*By way of illustration of growing density problems, the traffic committee now provides 6,500 parking spaces, including those adjacent to Parker Stadium, sells parking permits for 7,500 automobiles and welcomes many thousands of visiting motorists. It is estimated that students, faculty, staff and others directly associated with the University own 15,000 automobiles!*

*While the campus for the most part still has a refreshing, spacious look, when classes are in session there can be 20,000 people and nearly 10,000 automobiles within the space of a few blocks.*

these and other cases there is evidence that it would have been much better to have acted sooner.

### Out-of-state balance vital

In light of recent developments, the important factor would seem to be that the University not be reduced to a provincial college with very few nonresident and graduate students. This expediency would be distasteful to high school graduates, their parents, alumni, faculty and the industry of the '70s. And it would cost money.

This short-sighted approach eventually would answer the size worries, obviously. Few students with good academic potential and interest would want to enroll.

But the mathematical certainly is there at this time. If the optimum is on OSU of 20,000 students, 22,000, 17,500 or whatever and, if the all-important balance is to be

## Young honored . . .

district 6, Bend; Robert Payne, '52, district 9, Corvallis; R. Stevens Gilley, '56, School of Business and Technology representative, Portland, and Spencer T. Moore, '45, School of Forestry, Corvallis.

New members of the board elected are:

John Bergen, '37, district 5, Coos Bay; Dr. Ray P. Koch, '50, district 8, The Dalles, and Ken Place, '60, district 9; Robert Allen, '70, School of Humanities and Social Science, and Mrs. John Fenner, '39, School of Home Economics, all of Corvallis.

maintained, the planning must be underway.

And it's time for alumni to express their views on the subject in writing to legislators, education leaders and *Stater*.

## SIXTH ANNUAL TOUR PROGRAM—1970

This unique program of tours is offered to alumni of California, Stanford, Oregon State and UCLA. It is comparable to a program previously offered only to alumni of Harvard, Yale, Princeton, M.I.T., Cornell, Columbia, Dartmouth, and Univ. of Pennsylvania. The tours are based on special promotional air fares, for use in conjunction with tours, which save up to \$400 over regular air fares. Special rates have also been obtained from hotels and sightseeing companies. Air travel is on regularly scheduled jet flights of major airlines.

The tour program covers four areas where those who might otherwise prefer to travel independently will find it advantageous to travel with a group. The itineraries have been carefully constructed to combine the freedom of individual travel with the convenience and saving of group travel. There is an avoidance of regimentation and an emphasis on leisure time, while a comprehensive program of sightseeing ensures a visit to all major points of interest. Hotel reservations are made as much as a year and a half in advance to ensure the finest in accommodations.

## MOGHUL ADVENTURE

29 DAYS \$1649

An unusual opportunity to view the outstanding attractions of India and the splendors of ancient Persia, together with the once-forbidden mountain kingdom of Nepal. Here is truly an exciting adventure: India's ancient monuments in **DELHI**; the fabled beauty of **KASHMIR** amid the snow-clad Himalayas; the holy city of **BANARAS** on the sacred River Ganges; the exotic temples of **KHAJURAHO**; renowned **AGRA**, with the Taj Mahal and other celebrated monuments of the Moghul period such as the Agra Fort and the fabulous deserted city of Fatehpur Sikri; the walled "pink city" of **JAIPUR**, with an elephant ride at the Amber Fort; the unique and beautiful "lake city" of **UDAIPUR**; a thrilling flight into the Himalayas to **KATHMANDU**, capital of **NEPAL**, where ancient palaces and temples abound in a land still relatively untouched by modern civilization. In **PERSIA** (Iran), the visit will include the great 5th century B.C. capital of Darius and Xerxes at **PERSEPOLIS**; the fabled Persian Renaissance city of **ISFAHAN**, with its palaces, gardens, bazaar and famous tiled mosques; and the modern capital of **TEHERAN**. Outstanding accommodations include hotels that once were palaces of Maharajas. Total cost is \$1649 from New York. Departures in August and October, 1970.

## THE ORIENT

30 DAYS \$1649

1970 will mark the sixth consecutive year of operation for this fine tour, which offers the true highlights of the Orient at a sensible and realistic pace. As a special attraction, spring and summer departures will include a visit to the "EXPO 70" World's Fair in Osaka. Twelve days will be spent in **JAPAN**, divided between **TOKYO**, the **FUJI-HAKONE NATIONAL PARK**, and the ancient "classical" city of **KYOTO**, with excursions to **NARA** and **NIKKO**. A further highlight will be a comprehensive visit to the famous ruins of **ANGKOR WAT** in Cambodia, together with visits of 4 to 5 days in **BANGKOK** and **HONG KONG** and a shorter visit to **SINGAPORE**. Optional pre and post tour stops may be made in **HONOLULU** and the **WEST COAST** at no additional air fare. A complete program of sightseeing will include all major points of interest. Features range from a tour of the canals and floating markets of Bangkok and an authentic Javanese "Rijsttafel" dinner in Singapore to a launch tour of Hong Kong Harbor at sunset and a trip on the ultra-modern 125 mph express trains of Japan. Most tour dates include outstanding seasonal attractions in Japan, such as the spring cherry blossoms and beautiful autumn leaves and some of the greatest annual festivals in the Far East. Total cost is \$1649 from California, \$1828 from Chicago, \$1899 from New York. Special rates from other cities. Departures in July and September, 1970.

## AEGEAN ADVENTURE

21 DAYS \$1299

This original itinerary explores in depth the magnificent scenic, cultural and historic attractions of Greece, the Aegean, and Asia Minor—not only the major cities but also the less accessible sites of ancient cities which have figured so prominently in the history of western civilization, complemented by a luxurious cruise to the beautiful islands of the Aegean Sea. Rarely has such an exciting collection of names and places been assembled in a single itinerary—the classical city of **ATHENS**; the Byzantine and Ottoman splendor of **ISTANBUL**; the site of the oracle at **DELPHI**; the sanctuary and stadium at **OLYMPIA**, where the Olympic Games were first begun; the palace of Agamemnon at **MYCENAE**; the ruins of ancient **TROY**; the citadel of **PERGA-**

**MUM**; the marble city of **EPHESUS**; the ruins of **SARDIS** in Lydia, where the royal mint of the wealthy Croesus has recently been unearthed; as well as **CORINTH**, **EPIDAUROS**, **IZMIR** (Smyrna) the **BOSPORUS** and **DARDENELLES**. The cruise through the beautiful waters of the Aegean will visit such famous islands as **CRETE** with the Palace of Knossos; **RHODES**, noted for its great Crusader castles; the windmills of picturesque **MYKONOS**; the sacred island of **DELOS**; and the charming islands of **PATMOS** and **HYDRA**. Total cost is \$1299 from New York. Departures in July and September, 1970.

## EAST AFRICA

21 DAYS \$1649

A luxury "safari" to the great national parks and game reserves of Uganda, Kenya and Tanzania. These offer a unique combination of magnificent wildlife and breathtaking natural scenery: a launch trip on the White Nile through hippo and crocodile to the base of the thundering Murchison Falls and great herds of elephant in **MURCHISON FALLS NATIONAL PARK**; multitudes of lion and other plains game in the famous **SERENGETI PLAINS** and the **MASAI-MARA RESERVE**; the spectacular concentration of animal life in the **NGORONGORO CRATER**; tree-climbing lions around the shores of **LAKE MANYARA**; and the **AMBOSELI RESERVE**, where all types of big game can be photographed against the towering backdrop of snow-clad Mt. Kilimanjaro. Air travel is used where possible, enabling longer stays within the parks. Also seen are the fascinating capital cities of **NAIROBI** and **KAMPALA**, the exotic "spice island" of **ZANZIBAR**, and the historic **MOMBASA**, a beach resort on the Indian Ocean, with its colorful Arab quarter and great 16th century Portuguese fort. Tour dates have been chosen for dry seasons, when game viewing is at its best. The altitude of most areas provides an unusually stimulating climate, with bright days and crisp evenings (frequently around a campfire). Accommodations range from luxury hotels in modern cities to surprisingly comfortable lodges in the national parks (some equipped even with swimming pools). Total cost from New York is \$1649. Departures in September and November, 1970.

**Rates include Jet Air, Deluxe Hotels, Meals, Sightseeing, Transfers, Tips and Taxes. Individual brochures on each tour are available.**

## For Full ALUMNI FLIGHTS ABOARD

Details 145 East 49th St., Dept. C  
Contact: New York, N.Y. 10017

George Booras, at far right, administrative officer of the U.S. Forest Sciences Laboratory, talks with four of the lab's project leaders. They are, left to right, Clarence G. Thompson, '40; Robert F. Tarrant, '41; Dr. Robert H. Ruth, '43; and Dr. Roy R. Silen, '43.

As is indicated by the crane boom in the background, con-

struction of the new School of Forestry building is taking place adjacent to the federal complex on the west edge of the campus.

Hundreds of jobs and considerable technological impetus have been added to the Willamette Valley from the agencies and industries which have been attracted to the area by OSU's faculty and advanced programs in a number of fields.

## Campus suburbia... federal forest lab

By **CONNIE HANEY, '71**

*Assistant to the Editor*

**D**emands are increasing for more timber, more recreation, more water, more forage, more wildlife and a better forest environment. U. S. Forest Service scientists at the Forest Sciences Laboratory on the Oregon State University campus are searching for better ways to manage, protect and use forest resources.

The Forestry Sciences Lab is part of the growing "campus suburbia." The lab is located on land leased from OSU just west of the University Forestry building, now under construction. The federal lab is part of the research branch of the U. S. Department of Agriculture—Forest Service. It is the largest office laboratory unit of the Pacific Northwest Forest and Range Experiment Station.

The station, which has research responsibilities in Oregon, Washington, and Alaska has its main headquarters in Portland.

### Near OSU because of facilities

Research programs are conducted in close cooperation with OSU. The Forest Service located the Forestry Sciences Laboratory near OSU because of the many related research and educational facilities including the University's Forestry School, Radiation Center, Forestry Research Laboratory and the federal Pacific Northwest Water Laboratory.

The 18,000 square foot forestry lab was dedicated in 1962. It was constructed of western woods and built for expansion. Bids for the first stage of expansion, the Laboratory Services Building, will be opened in June 1970.

The present Forestry Sciences Laboratory office complex has 70 fulltime employees, including 18 OSU alumni, and facilities for research in forest insects, forest diseases, timber and watershed management.

U. S. Forest Service scientists at the Forest Sciences Laboratory and their many cooperators are

developing new technology to help meet the demands with the goal of an attractive, productive, unpolluted forest environment.

### Chemical use causes concern

Scientists in forest insect and disease research are working to reduce timber losses caused by insects and pathogens. Currently in the Northwest, insects and disease caused losses amount to about one-third of the volume of timber harvest.

Concern is building among foresters, land managers and the public about the use of chemicals in the forest environment. Studies include the impact of chemicals on the major elements of the forest ecosystem.

Through forest genetics scientists are working to safely improve the yields of Pacific Northwest forests. Investigations are being made in inheritance of tree growth characteristics involving inbreeding, use of genetic markers and study of racial and family variations among trees.

### Water quality studied

Timber management researchers are seeking to improve cultural practices for multiple-use management and to increase timber production in the mixed

conifer forests of the Northwest, by developing productivity and yield information necessary for timber management planning.

The watershed management group at the lab is investigating how forest management practices can be improved to curtail erosion, maintain water quality, provide favorable stream environment and regulate the quantity and timing of runoff from conifer watersheds in Oregon and Washington.

These activities being carried on by the U.S. Forest Services Laboratory are a vital part of the expanding "campus suburbia."

Construction will begin soon on the \$500,000 Laboratory Service Building shown in this architect's sketch. Located just west of the Forest Sciences Laboratory, the 12,000 square foot structure will help relieve crowded conditions in the Forestry Sciences Lab and will provide additional laboratories and related special purpose facilities.

Further additions to the Lab complex are proposed and some of these currently are being considered by Congressional committees.

### Oregon State University alumni with the Corvallis U.S. Forestry Sciences Laboratory are:

Gary E. Daterman, '64, Dr. Ted C. Dyrness, '58, Charles Gnose, '68, Paul J. Iwai, '65, Bobby R. Loper, '62, Dr. Kuo C. Lu, '53, Roswell C. Mersereau, '51, Dr. Russel G. Mitchell, '56.

Dr. Earl E. Nelson, '57, Dr. Logan A. Norris, '61, Donald L. Olson, '50, Dr. Robert H. Ruth, '43, Dr. Roger B. Ryan, '59, Dr. Roy R. Silen, '43, Dr. Frank C. Sorensen, '64, Albert Sugano, '65, Robert F. Tarrant, '41, and Clarence G. Thompson, '40.

### OSU is a big business

How much of a business is OSU?

OSU's annual payroll is approximately \$40 million. This goes to about 5,200 employees. Of these, 2,200 are academic and 3,000 are non-academic classified or civil service.

The current operating budget of OSU is \$58 million. Less than half of this—41 percent or \$24.3 million—comes from the state general fund; 28 percent, \$16.2 million, is from federal sources; 11 percent, \$6 million from student fees, and 20 percent, \$11 million, from miscellaneous sources such as board and room, athletics and student aid.

## "Spring Thaw"

Vince Brand, '71 of Stayton, above, quickly springs up and over the log in choker setting competition at the annual Spring Thaw.

In addition to featuring such highlights as a queen and her court, tug-o-war, egg tosses and mini-skirt judging, the Forestry Club's annual Spring Thaw is a time when OSU forestry students compete in the way Northwest men of the woods have competed for generations. There's choker setting, ax throwing, single bucking, double bucking, Jack and Jill bucking, speed chopping, fire fighting, log rolling and the boom run, all in a beautiful setting near Peavy Arboretum.

At left, putting his all into a single bucking effort is OSU's "Bull of the Woods," Steve Brown. Brown won the "Bull of the Woods" honor for compiling the most points in the overall competition. Individual event awards also were given. Below, it's obvious staying on a log can be a problem during Spring Thaw.

the competition, too. At left, Mary Carpenter, lets fly with an ax while Virgil Wallace, and Ken Faulk, '71, Corvallis, look on. Then Roy, '72, Salem, on the spinning log. At right, off on a speedy, precarious boom run.

Spring Thaw weekend began officially on Friday afternoon with the annual tug-o-war, below center, between a team of Foresters and an equal number of football players. Spray was flying as the husky football players pulled the Foresters through the stream of water. It was the first time in a number of years that the football players were able to offset the Foresters' "know-how."

At lower left, Pat McGillivray, '71, Eugene, keeps his end of the saw going in the double bucking. At right, Thaw chairman Russ Lawrence, '70, Lebanon, goes after the fire fighting opposition with his portable equipment. The object is simple. The last one with a lighted cigar in his mouth is the winner. (Spring Thaw photos by Bill Huhta, '70, Astoria.)

*Third in 42 years . . .*

# Ralph Miller New basketball boss

**R**alph Miller believes he has been fortunate enough to be in the right place at the right time frequently as a coach and athlete.

Some would say he's an example of the successful coach—an intelligent, clear-thinking man who has helped make his breaks.

Miller puts it this way: "The good Lord has watched over me many times."

For example:

In the mid-'30s he attended high school in Chanute, Kan., during what was by far the town's greatest athletic era.

His lovely wife just happened to have the right name.

Business misfortune sent him back to athletics as a coach. He selected the right sport to coach—and at the right high school.

And there were numerous other times in his undergraduate days at Kansas and while coaching that subsequent events have indicated Miller made the right decision.

He feels the same way about the move to succeed Paul Valenti and become Oregon State's third basketball coach in 42 years—the right move for a rare opportunity.

## **Chanute High's greatest years**

It all began for Miller in the Southeastern Kansas city of Chanute. He said it was safe to refer to Chanute as a city of 10-to-11,000 people.

"Supposedly, it reached 10,000 back about 1916," he explained. "To this day, I don't believe it has been under that or over 11,000."

While the population has been stable, athletic fortunes have not been. Chanute has had few championship years in the tough Southwest Kansas League.

But there were half-a-dozen years in the mid-'30s when Chanute was known throughout the Plains states as one of *the* powers in any sport. Miller and his father, one of the high school administrators and coaches, were part of it.

Miller was there for four years of football and track and three of basketball. And they were phenomenal teams. In four years, tailback Miller played in only two losing football games, and he knew only four losses in basketball in three years. There also were two league track titles.

Miller was first-team all-state three years in football and set a high hurdles record that stood for 11 years. Additionally, he lettered in golf and tennis.

"We didn't have baseball and the track meets usually were on weekends," he recalled. "That meant we could get in golf and tennis in the middle of the week."

Miller went on to the University of Kansas as a three-sport athlete.

A knee injury midway through his sophomore football season temporarily stopped his athletic career and finished his track competition. That spring he had a knee operation and it was repeated the following spring.

## **Records posted in football**

After laying out a year, Miller returned to star in football, first as a tailback and then as a T-quarterback, and earned all-conference honors in basketball. While learning how to absorb some defeats with break-even football teams, he set passing and running marks for KU. His single-game offense mark of about 270 yards still was on the books a few years ago.

*Coach Ralph Miller  
"Pressure" on the way*

In the meantime, there was the matter of a KU coed, Miss Jean Milan. That name is very close to Miller when considered alphabetically, and so the two names wound up side-by-side in a physiology class.

Star athlete Miller and journalism major Miss Milan began dating. His knee injury resulted in his being held out of athletic competition a year. That dropped him back to the Class of '42, which happened to be Jean's class.

It all worked out wonderfully.

Today, the Miller family also is well-known in their community. There's Jean, very active in a number of community projects and organizations; Susan, 24; Ralph, Jr., 21; Paul, 14, and Shannon, 10.

During World War II, Air Force Lieutenant Miller had his first duties as a basketball coach. He was assigned as a player-coach for a team at Drew Field, Tampa, Fla., and later at March Field in California.

Relatives helped convince him to remain in California after the war and he served for a time as assistant city recreation director in Redlands.

That's when business "opportunity" knocked. In Miller's case it

was a wholesale fruit brokerage. It turned out to be one of those ventures that offered most of its profits in the form of experience.

### **Wichita calls again**

Even so, Miller passed up a Wichita high school football coaching job. It didn't seem right. Then in 1948 there was a basketball coaching bid from Wichita East High.

Wichita East was the largest high school in the area with about 3,500 students, but had recorded very limited basketball success. On the surface, California seemed to offer more opportunity, if not necessarily in the fruit brokerage business. But Miller's radar was telling him something.

"I asked my father to check on the situation at East. He looked it over and told me that, while the basketball program had been weak, there were some young boys coming up who could be developed."

Miller's first high school team finished second in the state, the next one was third and the last one, in 1951, won the state title.

This instigated the move to Wichita State and the Missouri Valley Conference, called by many the toughest league in basketball at that time of Cincinnati national championships.

Miller was at Wichita 14 years. His teams earned four trips to the National Invitational Tournament in New York and won the league title in 1964. He was named Missouri Valley Coach of the Year three times. His Wichita players included Dave Stallworth and Nate Bowman, now both with the New York Knicks.

At Iowa, more success followed. He was voted Big Ten Coach of the Year twice as his Hawkeyes were co-champions in 1968 and undefeated champions last year.

### **"Pressure basketball" to OSU**

What Miller brings to the long tradition of OSU basketball is "pressure basketball."

"Pressure," Miller explained, "can be defined as attack and at-

tack throughout the game—both on offense and defense."

He said the approach was similar to that employed by national champion UCLA.

"We either go full-court or half-court press *all* of the time on defense. We take no 'rest periods' trotting back on defense. We attack the ball. We want to wear the opponent down. Eliminate the resting periods."

Miller's Iowa team last year averaged 103 points a game, topping the 100-mark 14 times enroute to an unbeaten Big Ten campaign. That gives a clear indication of his approach on offense.

In the NCAA playoff the Hawkeyes lost in the Regionals, 104-103, to eventual championship runnerup Jacksonville when the latter scored on a last second tip-in. Iowa turned right around and walloped Notre Dame in the third-place game, 121-106!

It's an offense that not only features running, but also sharp passing.

"Sharp passes are the most effective way to play fast-break basketball. A good pass moves quicker than any man can."

Asst. Coach Dave Leach  
Ex-Wichita State captain

It has added up to 315 victories against 184 losses in 19 years of collegiate coaching and there's been only one losing season.

"In Ralph Miller, the OSU Athletic Board has attracted to OSU one of the top five coaches in the nation," OSU Athletic Director Jim Barratt said. "His credentials are impressive and his relations with students, faculty, and alumni at Wichita and Iowa have been excellent. He and Jean will blend smoothly into the OSU family."

### **Anderson will remain**

The new coach accomplished his first objective at OSU.

He convinced Jimmy Anderson, '59, to stay on as assistant coach. Anderson has done an excellent job while on the OSU staff a total of nine years as coach of the Rooks and then as Valenti's assistant. He's highly regarded by all in basketball.

Dave Leach, captain of the 1965 Wichita State team and now coach at Burlington Junior College in Iowa, was picked by Miller as his second assistant. An all-state prep selection at McPherson, Kan., Leach went on to become an honor student and student body president at Wichita State as well as a basketball star.

Miller generated a great deal of excitement as he talked to alumni and fans in a number of Oregon cities in April. Headlines blared that season tickets should be ordered early.

Interestingly, when Miller arrived at Wichita State in 1951, a total of nine season tickets were sold the first season. By the time he left for Iowa in '64, 9,000 season tickets were being sold.

It was a similar situation at Iowa, where crowds grew until the huge 13,800-capacity gym was sold out game after game.

Miller said he would be disappointed if there weren't some sell-out crowds at Gill Coliseum next season.

(Continued on page 20)

# Women's team posts record of 54-0!

By Paula I. Keeney, '71

**B**asketball is not only a man's game. Women at Oregon State University have been proving it for years.

The OSU women's basketball team recently completed its sixth consecutive season without a loss. Completing their season with a 9-0 record, the gals culminated six years of competition with 54 consecutive wins to their credit!

The Oregon State women's team was last beaten in 1964. They lost to the University of Oregon by one point. It was the first Beaver loss in four years.

Basketball is only one of the 10 sports Oregon State University women play on a competitive level, but in the past years it has been their best.

Compared to men's basketball, the women's season is a short one. The team doesn't begin to take shape until the middle of January.

The month-and-a-half-long season averages from 8 to 12 games played against colleges and universities in the area. Over the past several years, Oregon College of Education, Portland State University, and the University of Oregon have been consistent opponents for the Oregon State gals.

## Beaverettes are marked

"We play these teams because they are the best around, and we want to play the very best," says Coach Linda Guggenheim.

"We are a marked team," says one former player. "Each team you play wants to be the team that knocks off a winner."

One problem that the OSU women's team doesn't have is a lack of players. In the past several years the program has proven so popular that coaches have had to form two teams. The teams oppose the same college and university competition, but play different 'A' and 'B' teams.

## New rules help game

This year the OSU team com-

peted under experimental rules. Usually in girls basketball there are six players — two forwards, two guards, and two rovers. While the forwards and guards are restricted to their respective halves of the court, the rovers are permitted to play the entire floor, allowing only four players from each team on any one half of the court at one time.

However, this year, the Division of Girls and Women's Sports (a division of the American Association of Health, Physical Education, and Recreation) decided to let the girls go full court and use five players per team, utilizing rules similar to those played by men.

"It's a lot more fun to watch now. There's a lot more action and the girls are starting to score more. I really like it and I think the girls do too," says Coach Guggenheim. If the other teams across the nation, who are using the experimental rules, like the idea, the change could be permanent.

## Four years and no losses

Desire to play basketball is the driving factor behind the women who each winter turn out for the team. All practices and competition are scheduled for evenings.

Nadine Grass, a 1969 OSU graduate now teaching physical education in California, played on the OSU team for four years. Although Nadine played on several of the competitive teams while at OSU, basketball was her greatest success, and she never played in a losing game.

This year, Lyla Voth Riebel joins Nadine on the exclusive list of "non-losers," after completing her fourth season on the Oregon State team.

Basketball is over for the Oregon State gals for this year. Not until next January will they once again turn out for the sport. Then they start out with a clean slate, no previous wins to fall back on. But you can bet that with the impetus that past OSU teams have given them, they will be off to a good start.

# Miller new coach . . .

(Continued from page 19)

## Guard strength returns

Understandably, however, he said it may take a little time before the new Beavers have adapted fully to the new system.

"That's a tough schedule. We may not be able to show much in December. By January we may be able to win some. But watch out for us in the last half of the season."

From this year's 10-16 team, Miller will have back the two guards who started and starred in the final big win over U of O, Freddie Boyd and Billy Nickleberry, plus half-a-dozen reserves and red shirts, including forwards Gary Arbelbide, Tim Perkins, and Larry Webber. Among the Rook prospects are former Oregon all-staters 6-2 Gary Erickson from Salem and 6-9 Neil Jurgenson from Eugene.

Miller hopes to add a junior college transfer or two.

For most of its first century, Oregon State helped maintain its tie with alumni and the community in general with a strong basketball program.

The hiring of Miller gives every indication that this will continue.

# Beaver fans mourn all-star Lew Beck

One of Oregon State's greatest basketball players, **Lew Beck, '50**, died April 3 at his home in Great Falls, Mont.

Beck, an all-state high school star at Pendleton, was an All-American and earned the Helms Foundation award for his play with the OSU 1946-47 PCC champions. He was All-Coast and All-Northern Division in 1943 and in 1947.

He captained the 1948 U.S. Olympic team and starred for several years with the Phillips Oilers, the top AAU team in the country. The late Coach Slat Gill named Beck as his quickest ball player and his best dribbler.

Survivors included his wife Florence, a son and three daughters.

# Sports thrill? A transplanted Rose Bowl Game

By LATHROP K. LEISHMAN, '26

Oregon State University, my alma mater, supplied me with my greatest sports thrill nearly 30 years ago. Could history repeat itself? Who knows?

On December 1, 1941, 61 entries had been received for the Tournament of Roses parade. Association President Robert McCurdy announced the parade list as being

"Much credit for the success of the Rose Bowl Game can be attributed to the efforts of the Tournament's Four Horsemen—Lathrop K. Leishman, Raymond A. Dorn, William H. Nicholas, and Stanley Hahn. As chairman (for a quarter of a century), Leishman might be tabbed as the quarter-back signal caller . . ."

So a tribute to Lay Leishman and others of the Tournament of Roses Football Committee began. According to the story, the committee has a 364-day-a-year job. The 365th day is, of course, New Years Day, the busiest of them all.

Leishman was moved from his birthplace of Terminal Island, near Long Beach, to Pasadena his first year. It was appropriate he had an early start in Pasadena because he was to become one of its most devoted and hard-working residents. His list of community service activities is much too lengthy to be repeated here. In 1965, he was given the Arthur Noble Award for Pasadena Community Service.

One locale that shares some of his affection with Pasadena is Corvallis and Oregon State. He came to Oregon State in the fall of 1922 and graduated in 1926 with a degree in business administration.

He returned to Pasadena and became a partner in the Crown City Lumber and Mill Co. In 1963, he left the lumber company for a partnership with a capital investment firm. He began his association with the Tournament of Roses in 1929 and had the very big job of president of the association in 1938-39.

Some of his other honors and posts have been director of the Pasadena Chamber of Commerce, director of the Merchants & Manufacturers Assoc. of Los Angeles, president of the Southern California Retail Lumber Dealers Assoc., and honorary member of the Football Writers of America.

Few have been closely involved with more Rose Bowl games. His "sport thrill" choice, therefore, takes on added significance.

*This ticket is genuine and one of the most prized in all of sports—a Rose Bowl Ticket. But it turned out to be of no value—a ticket to nowhere. There was no Rose Bowl game in Pasadena Jan. 1, 1942. Oregon State met Duke at Durham, N. C., and left behind the Tournament of Roses floats, officials, court and queen. For official Lay Leishman, however, it was "my greatest sports thrill."*

closed. Five days later, Kay Kyser was named Grand Marshal. His radio program, originating from Pasadena's Civic Auditorium, was carried on 123 stations throughout the country.

And then the bombs fell on Pearl Harbor on that December 7. Our naval and army forces were dealt a serious blow and the United States was plunged into war.

Parades had been held during other wars, though. The President of the United States on two occasions gave official approval for the continuance of the fete. This was during the Spanish American War and World War II. Therefore, the Tournament officials continued their planning. On December 10, the Association's Participants Dinner was held on the night of the first blackout. Nevertheless, the officials were enthusiastic about carrying on as planned.

While work on floats was continuing, a radio broadcast from San Francisco bore some very startling news—the cancellation of the Rose Parade and the Rose Bowl Game. At 5:30 p.m., Gen. John DeWitt, commanding general of the Fourth Interceptor Command encompassing the Pacific Coast, broke the news with a brisk and abrupt military order. President McCurdy and the Football Committee, of which I was chairman, flew to San Francisco and met with General DeWitt

at 11:00 a.m. on Sunday. This was just one week after the devastating attack on Pearl Harbor.

## Duke extends an invitation

After going over the general situation, it was decided that the parade should be dropped due to the possible hazards involved in the large congregation of people. The work on the grandstand seats along the parade route stopped.

At the invitation of the Duke University officials, the Rose Bowl Game site was changed to Durham, North Carolina. The 90,000 tickets

Lathrop K. (Lay) Leishman, '26  
"Mr. Rose Bowl"

printed for the Pasadena tilt were burned in one big blaze.

The Rose Queen wore two crowns—she was also the Victory Queen. It was a sad, cold day in Pasadena on January 1. The grandstands were empty and lonely looking.

Queen Dolores Brubach and her Court, who were to have ridden on a majestic float that day, drove quietly down Colorado Boulevard in a private, decorated car, almost unnoticed by the few people on the streets. The only reminders of the parade were the accompanying trumpeter and the huge V for Victory affixed to the car.

### Duke a 5-1 favorite

Later in the day, 16 members of the Tournament of Roses Band from Pasadena City College marched in a V formation down the same thoroughfare and played martial airs as they marched along the famous processional route. Thirty-three miniature floats were displayed at the dinner held later in the day at the Hotel Huntington.

Wallace Wade showed true Southern hospitality by agreeing to host the game pitting Duke against Oregon State. The stadium was expanded from 35,000 to 56,000 seats. The Blue Devils were a solid 5 to 1 favorite due to their unbeaten record.

Due to travel restrictions, the Tournament of Roses was represented at the game only by Tournament President McCurdy. Everyone

in Pasadena huddled over their home radios to get play-by-play reports of the tussle. There was a group listening with tense anticipation at the Leishman residence.

It was a truly great contest with Oregon State's magnificent defense rising to the occasion to thwart the Duke Blue Devil spirited offensives. A spectacular punting duel featured the game, with Duke's Elmer Lach getting the upperhand with a 47.3 average as compared to OSU's Don Durdan's 44.3-yard average per kick. The Beavers capitalized on the option play with Durdan again in a starring role, sharing the game honors with Bob Dethman, his versatile teammate.

### Game proves a 'knockout'

With the score at the game's end 20-16, with Oregon State on the long end, pandemonium broke loose. My two boys, Bob and Bill, began turning somersaults on the livingroom floor as a display of delight at the great victory. Lo and behold, the two of them collided, knocking each other out with the bumping of their heads. This is the only time in history that two people were knocked senseless over 3,000 miles from the scene of grid combat.

Well, the unexpected aftermath of the exciting contest, of course, had a happy ending as the lads came to in good time.

I still maintain that the score Oregon State 20, Duke 16 represents my greatest sports thrill.

## The Education of Kate Haracz

An explosive view of  
America's \$25 billion investment  
in higher education

*"M. didn't even bother showing until the third week of classes and then when he did, I wished he hadn't bothered. He's one of the New Profs, the ones who come on casual and try to play it cool, knock the System, and in other ways try to con us into thinking that they're one of us, the great unwashed disaffected student body."*

From "The Diary of Kate Haracz"  
Change Magazine

**Kate Haracz** is a 21-year-old Michigan State junior, whose mind bending 11,000-word diary is likely to upset just about every notion you've ever had about college. It appears in the current issue of **Change Magazine**, America's exciting new bimonthly magazine on higher education and society.

You can now take advantage of a unique opportunity to receive a half-year, no-risk trial subscription to one of America's unique new magazines...for a mere \$2.50, rather than the regular \$8.50 full-year subscription price. You can begin with Kate Haracz's memorable account, so long as the supply lasts. All you pay is \$2.50. If you decide to cancel after reading Kate Haracz's moving document, a refund for the remaining copies will be automatically mailed. Either way, Kate Haracz's account of university life is yours.

Curt Gowdy, NBC-TV sports announcer, presents Leishman with the 1969 SPORT Magazine Special Service Award. The award went to the Tournament of Roses veteran for his "lifetime of dedicated sports leadership and community service."

# News of classmates and friends

---

12

**Clark E. Schultz**, who had spent 58 years of continuous operations in the various phases of production and distributing carlots of fruits and vegetables, sold his ranch and retired last June.

---

21

**R. S. (Spec) Keene**, athletic director at Oregon State from 1947 to 1964, has been named to the newly-created Helms Athletic Hall of Fame for retired athletic directors who have made vast contributions to their schools.

---

22

**David M. Dunne** is a retired U.S. Army officer and is currently serving as mayor of Carlsbad, Calif.

**Dr. Paul H. Emmett**, retiring W. R. Grace professor of chemistry at Johns Hopkins University, was honored by the Catalysis Club of Philadelphia in March for his outstanding contributions to the field of catalysis.

---

23

**Fred Merryfield** of Corvallis retired last fall as staff manager of Cornell, Howland, Hayes & Merryfield, one of the nation's largest and most respected engineering and planning companies. He was elected vice president of the International Water Supply Association last September.

**Florence King Bolinger** is now living in Ashland, Ore., and writes that her four sons were all OSU graduates.

---

24

**Dr. Harold M. Scott**, retired professor of animal science and head of the poultry division at the University of Illinois in Urbana, has been selected as a Fellow of the American Institute of Nutrition. Mrs. Scott is the former **Elizabeth Hill**, '22.

---

25

**Paul Keller**, former artist for the Oregon Journal newspaper, recently took a "painting holiday" tour of Spain and Portugal with 34 other artists from many parts of the United States, Canada, and South America.

**Glenn L. Jackson**, chairman of the board of Pacific Power & Light and chairman of the Oregon State Highway Commission, was recently named to the National Alliance of Businessmen by President Nixon.

---

26

**Dr. Milton Harris**, chairman of the board of directors of the American Chemical Society, recently accepted the Society of Chemical Industry's Perkin Medal. He lives near Washington, D. C.

**Burton S. Hutton** of Corvallis will retire July 1 as state leader of Oregon's 4-H program. He joined the state 4-H staff in 1948.

**Buell E. Wilcox**, chief of the engineering division of the Portland U.S. Army Engineer District since 1959, retired April 30 after completion of 34 years' federal service. Mrs. Wilcox is the former **Claire Blazier**, '33.

---

28

**Floyd Light**, retired superintendent of the David Douglas school district, has announced his candidacy for the Oregon House of Representatives. He and his wife (**Mae Parks**, '31) live in Portland.

**D. Reed Miller** will retire in July after having worked for the U.S. Forest Service for over 43 years.

**Alexis A. Lundstrom** of Sparta, N.J., was recently elected a Fellow by the Institute of Electrical and Electronics Engineers. He is head of the systems studies department at Bell Telephone Laboratories in Whippany, N.J.

---

29

**W. J. Cloyes** is now the resident engineer at Tahoe Industrial Park in Reno, Nev.

---

30

**Marion T. Weatherford**, Eastern Oregon rancher and businessman, was recently elected to the board of directors of U.S. Bancorp and its wholly-owned subsidiary, U.S. National Bank of Oregon.

**Simon Soboleff** is now retired from the U.S. Bureau of Public Roads after serving as a highway engineer in Fairbanks, Alaska.

---

31

**Clarence R. McAyeal**, a civil engineer with the Portland U.S. Army Engineer district, has retired after completing more than 33 years of federal service.

---

32

**Loran L. Stewart**, president of the Bohemia Lumber Co. in Eugene, has been appointed to the Oregon Board of Higher Education by Gov. Tom McCall.

**Mark "Buck" Grayson**, who has been commissioner governing the city of Portland the past 12 years, has not filed for re-election and plans to retire.

---

33

**C. Robin Batcheller** has been head of the art department of the Collegiate School for Boys in New York City since 1954.

**William Langan**, head adviser for the OSU School of Agriculture since 1935, will retire at the end of this school year.

---

35

**Mary Whitelaw Rieke**, who is retiring from the Portland Board of Education after 12 years, has announced her candidacy for the Republican nomination for the House of Representatives.

**Maurice G. Staton** has been promoted to division vice president of marketing and advanced planning of at RCA's Astro-Electronics Division in Moorestown, N.J.

**Mabel Sandoz Jacquot** is teaching home-making in a junior high school in San Gabriel, Calif.

---

36

**Fred Hill**, a wheat rancher in Helix, has been re-appointed by Gov. Tom McCall to a second three-year term on the Oregon State Highway Comm.

---

37

**Cyril H. Thompson**, Benton County farmer and teacher in Oregon, has filed for the Republican nomination for Benton County clerk. Mrs. Thompson is the former **Evelyn Scott**, '38.

**John R. Stevenson** recently was named principal of the Low Mountain School in the heart of the Navajo Reservation at Chinle, Ariz.

---

38

**William A. Reyburn, Jr.** has been appointed credit manager for CF & I Steel Corp. in Denver. Mrs. Reyburn is the former **Myna Hoy**, '36.

**Dr. Frederick H. Young**, a professor of mathematics at OSU, has received the first appointment as professor at the new Evergreen State College in Olympia, Wash.

**Walter H. Palmberg** is president of Central Wyoming College, a two-year school which stresses computer and electronic technology training, in Riverton, Wyo.

---

39

**Dr. Lyle H. Johnson**, the Dean of Students at Eastern Oregon College, will retire June 30. He has served in various capacities at the campus in LaGrande since 1942.

---

40

**Hector MacPherson, Jr.**, Linn County farmer and chairman of the Linn County Planning Commission, is seeking the Republican nomination for the state senate.

**Donel J. Lane**, director of the Oregon State Water Resources Board, was appointed by President Nixon to be the chairman of the Pacific Northwest River Basins Commission.

---

41

**Irwin C. Harris**, manager of student publications and public events at OSU, recently was elected president of the Pacific Coast College Publications Managers for the third time. Mrs. Harris is the former **Kay Ferris**.

**Charles H. Starker** is now assistant to the head of plant science field research for Eli Lilly & Co. in Greenfield, Ind.

---

42

**Dr. William Herbert Huggins**, Westinghouse professor of electrical engineering at Johns Hopkins University in Baltimore has been elected a member of the National Academy of Engineering.

**R. J. Hutchinson** has been promoted to sales manager, Western region, by the Kenworth Motor Truck Co. in Seattle.

**Rex Wakefield**, general manager of lands and operations for Rex Clemens Forest Industry of Philomath, recently was appointed to the Board of Forestry by Gov. Tom McCall.

Dr. **Carl M. Anderson**, head of the chemistry department of Linfield College in McMinnville, Ore., has been elected a Fellow of The American Institute of Chemists.

---

## 43

**William F. Barratt** has been elected president of the Federal Intermediate Credit Bank of Spokane. Mrs. Barratt is the former **Bonnie Lee Ferguson**, '44.

**William T. Wisbeck** has been appointed chief of the U.S. Department of Agriculture's Grain Inspection Branch in Washington, D.C.

**Norman Peters** has been spending the past several years developing a cattle ranch in the San Joaquin Valley in California for the Westgate-California Corp.

---

## 45

**William Mikkelsen** is the founder and president of Smoke-Craft, Inc., headquartered in Albany, Ore., and now having a national market with representatives in every state. His wife is the former **Fren Morse**, '46.

Mr. and Mrs. **Robert Mikkelsen (Shirley Bowder)** live in Albany, Ore., where he is president of the First Northwest Corp., an investment brokerage firm.

---

## 47

**Robert H. Eaton** is manager of the U.S. Hop Marketing Commission in Portland. His wife is the former **Marian Carl**.

Dr. **Lawrence Carrillo** is a professor of education at San Francisco State College in California.

---

## 48

**Thomas W. Thompson**, Wasco County extension agent at The Dalles, has been attending OSU this year working towards a master's degree.

**Donald G. Drake**, president of the Drake Development Corp., has been elected president of The Port of Portland Commission for 1970.

**Betty Christensen Mosar**, a mathematics teacher at Warrenton High Schol, is president of the Oregon State Division of AAUW.

---

## 49

**John B. Alexander** has been appointed store manager of the J. C. Penney downtown Portland store. He and his wife (**Vera Bishop**) will continue to live in Gresham.

**W. T. "Bill" Harper**, vice president of Lewis Steel Fabricators, Inc., in Portland, is the 1970 president of the Builders Exchange Cooperative. Mrs. Harper is the former **Dorothy Yedd**.

**Thomas B. House** recently was named president of the American Frozen Food Institute at the Western Frozen Food Convention in Monterey, Calif.

**Herbert J. Hill** has been promoted to assistant vice president of departmental services for the Standard Insurance Co.

# Ben Cohen on the go; spreading OSU word

The mails strongly indicate that wonderful **Benjamin Cohen**, '17 (*Stater*, Winter 1970) is spreading the word of Oregon State University across the Pacific.

## To the Editor:

I am writing this letter aboard the S.S. Statendam, a cruise ship, on the way to Expo '70 in Japan.

One of the most interesting passengers I have met is a Mr. Benjamin Cohen. During one of our visits he mentioned OSU as his alma mater and the struggle he had to obtain a college education after his move to the U.S. During our conversation he mentioned the forthcoming autobiography "I Dreamed and I Succeeded" and showed me the articles written in the Oregon Stater Winter 1970 edition.

I should like to commend you for making articles like this available to the alumni and others it might reach. I found it honest, direct, simple and, above all else, sincere. Mr. Cohen is to be commended for his honesty and willingness to show a dream and encourage others who might feel it is impossible to make it. I hope you will continue to publish excerpts from his book.

J. H. Calhoun  
Protestant Chaplain  
Orient Cruise

## To the Editor:

I have had the pleasure of meeting Mr. Benjamin Cohen on this cruise. I have read with interest his life story in the Stater.

At 81 I am going from this ship at Yokohama around the world home via some historic places I have missed in Siberia—namely Samarkand and Taskent. I am a writer.

A "do it yourself the hard persistent way" with the Dream Angle Poem should be a good morale story for the youth of today. Whether *anything* that means work will do them any good these days is a question.

Dwight F. McKinney  
Holland-America Line  
Statendam

## To the Editor:

I entered OAC September 1901 as a sub-freshman from Roseburg.

Your *Oregon Stater* April 1970, page 18 picture: Two of them I am sure, three others seems like I saw them just yesterday, but can't recall their names.

Second from the right is "Pappy" Stokes and fourth is **Claude Cate**. These two were on the basketball team when I started playing . . .

The more I look at the picture I am sure I know them all. The background is either Mechanical Hall or north side of Armory and gym. The building I knew as Agri Hall was not built then.

I wore a hat like **Claude Cate's**. Derbies were on their way out.

I have quite a collection of athletic pictures, but 60 years has taken its toll.

**Cliff S. Benson**, '06  
P.O. Box 968  
Mehama, Oregon

**Brooke Hukill**, '14, of Pico-Rivers, Calif. says "most of the faces are as familiar as are the rocks of the old Armory in the background."

Our thanks also to **Claude E. Carlson**, '43, of Portland, Ore. for his interest in this picture.

**Martin O. Kurtz**, '18, of San Mateo, Calif. identifies the "carousing" seniors on page 13 of the April 1970 *Oregon Stater* as (left to right) **J. F. Forbis**, **T. W. Wade**, **F. D. Suffron** and **A. E. Young** all class of 1915.

With the help of the above clues, Archives was able to identify that dapper group (p. 18, April *STATER*) as the 1903-04 basketball team, Left to right, **Haman Bilyeu**, **Guy Sherwood Moore**, **Grover Cleveland Cate**, **Claude Clifton Cate**, **Floyd Bushnell Davis** and **Teroah Winfield Scott**. These early Beavers had a good season, winning seven while losing only three.

## To the Editor:

I enjoy reading the *Oregon Stater*; it helps me to keep in contact with the OSU community.

While attending OSU most students do not know what the years following school will bring. I continued the family business and am very proud to announce it is celebrating 100 years in Portland. As time has passed, we have expanded our operations with customers now as far north as Nome, Alaska, and as far east as Chicago, Illinois. I enjoy daily contact with old friends who drop into the store to say "he'l'o."

It is gratifying to have been a part of a college which still stands for the development of personal integrity and responsibility on the part of its students.

**Carl L. George**, '14  
George and Son Cutlery  
424 S.W. Washington  
Portland, Oregon 97204

When **Arnold Ebert**, '36, chairman of Agriculture Information on campus, heard that some alumni had indicated in their *Stater* questionnaire that they did not care for OSU's thousands of visiting grosbeaks (*See Report from Alumni Headquarters*), his observation was "for the birds."

"The alumni should know," he said, "that a recent 'spot check' of the grosbeaks showed that they were not much in favor of alumni or any other visitors."

**Karl F. Wojahn** of Huntington Beach, Calif., is quality control manager for Mattel Toymakers, Inc., and recently completed two years establishing quality function in their Hong Kong manufacturing plant.

**Wesley G. Bruer** has been named chief of the California Division of Mines and Geology.

**Tom Hartung**, state representative from Washington County, has been chosen a member of the Pacific University board of trustees. Mrs. Hartung is the former **Beverly Tice**.

Mr. and Mrs. **Al Van Etten (Barbara Blanche)**, '51 are living in Puyallup, Wash., where he is chief physical therapist at the Good Samaritan Rehabilitation Center.

**Andrew V. Smith** has been promoted to vice president in charge of operations at Pacific Northwest Bell's Seattle headquarters.

**Ted Davenport** has been appointed manager of Anodizing, Inc., in Portland. He will direct the newly-opened fabrications department which produces aluminum window compartments.

## 51

**Benjamin R. Whiteley** has been elected vice president, Group Insurance Administration, for the Standard Insurance Co.

Maj. **William V. D. Hickerson** is now flying helicopters at Davis-Monthan AFB near Tucson, Ariz., and hopes to retire in the Northwest next year.

**J. Michael Locey** of the Corvallis Packing Co. was elected to the 15-man board of directors of the Northwest Food Processors Association recently.

**Arthur W. Wells** has been named assistant special agent in charge of the Little Rock, Ark., research and crime records office of the FBI.

**William E. Butler** has been promoted to vice president of forest resources for the U.S. Plywood Division, U.S. Plywood-Champion Papers, Inc. He and his family live in Redding, Calif.

**Stuart N. Wells, Jr.**, has been named executive assistant in the fire control division for the Oregon State Department of Forestry.

## 52

**Ronald E. Smith** has been named director of the Oregon State Forestry Department's Northwest area headquartered in Forest Grove.

**Norm Kennedy** is a registered representative in the marketing division for Horace Mann Educators and Investors, Inc., in Eugene.

**G. F. Franciscovich** lives in Walnut Creek, Calif., where he is a supervisor for Standard Oil of California.

## 53

USAF Lt. Col. **William A. Fahlgren, Jr.**, has assumed the position of communications-electronics staff officer headquartered at the North American Air Defense Command, Ent AFB, Colo.

Mrs. Marvin Campbell (**Molly Driscoll**) is a registered nurse working part-time at the Woodland Park Hospital in Portland.

**Don Megale**, who will receive his doctorate during June commencement at the University of Utah, was recently nominated for election to the honor society of Phi

Kappa Phi. He is an assistant professor of physical education at OSU.

**Donald L. Barber** has been named assistant vice president of information systems for Standard Insurance Co.

## 54

USAF Maj. **Jack Van Loan**, who was reported missing in Vietnam in 1967 when his plane was shot down, was recently confirmed as being held captive in North Vietnam. His wife and children live in Tucson, Ariz.

Lt. Col. **Edwin C. Lindberg** has received the Distinguished Flying Cross, the Bronze Star Medal with special "V" device for valor, his eighth award of the Air Medal, and his second award of the Air Force Commendation Medal. He is stationed at McChord AFB, Wash.

## 55

**Ronald J. Moreland** is sales manager of the large turbine division of Westinghouse Electric Corp. in Philadelphia. He is married to the former **Mary Myatt**.

**Gene Spathas** operates Claudia's Tavern in Portland and is also co-owner of the Kitchen Kettle restaurant there.

**Robert E. Pailthorp**, project manager in the industrial processes division of Cornell, Howland, Hayes & Merryfield, has been elected president of the Professional Engineers of Oregon for 1970-71.

Maj. **James O'Brien** is now testing the U.S. Air Force's new A-7D Corsair II for operational evaluation at Luke AFB, Ariz.

## 56

Chaplain **John Samuel William Hosford** of the U.S. Naval Air Station in Corpus Christi, Tex., is the author of a meditation selected for publication in The Upper Room daily devotional guide, an interdenominational publication with a circulation of near three million.

**R. Stevens Gilley** has been manager of the Portland office of Norris, Beggs and Simpson for the past three years.

**John L. DeZell** has worked for Connecticut Mutual Life in Portland since

1967. Last summer he was awarded a trip to Ireland by the company.

**C. Gary Peterson** is a registered professional engineer in Portland and is currently president of the Oregon section of the American Society of Civil Engineers.

Mr. and Mrs. **Bill Robinson (Beth Wendt)**, '55 are now living in Santa Maria, Calif., where Robinson is senior industrial engineer for the McDonnell-Douglas Co. at their Vandenberg AFB test center.

## 57

Dr. **S. M. Purcell, Jr.**, and his family have moved to King of Prussia, Pa., where Purcell is assistant director of laboratory animal care for Smith, Kline & French Laboratories, Inc.

**Allan M. Hanson** of San Rafael, Calif., is president-elect of H & R, Inc., a pharmacy corporation.

Dr. and Mrs. **James R. Graves (Janet Reisner)**, '59 are announcing the birth of a son, Jeffrey, on Mar. 20, 1969. They live in Portland.

**Arlen McDonald** is now sales manager for Harman Land Corporation and Corvallis Realty in Corvallis.

**James W. Warren** has returned to his work as fish pathologist for the North Central Region of the Bureau of Sport Fisheries & Wildlife in LaCrosse, Wisc. He recently completed a seven-months assignment in the NASA Lunar Receiving Laboratories in Houston, Tex.

**Terry C. Valo**, has been appointed chief engineer of Sandwell International, in Portland.

**J. M. (Mike) Wetherbee** has been promoted to Western Region marketing manager for the Grocery Division, Beatrice Foods Co. His home is in Milwaukie, Ore.

**Paul F. Wilmeth**, Salem pioneer in post high school vocational education, has been named president of Salem Technical Community College.

**Melvin T. Nygaard**, a certified public accountant and past president of the Portland Junior Chamber of Commerce, was recently named Portland's Junior First Citizen for 1969.

**John C. Narver** has been appointed coordinator of faculty research in the Graduate School of Business Administration, Uni-

*This photograph was given to the OSU Archives from the collections of the late Mrs. James A. (Grace Starr) Cooper, '08, of Corvallis. These lovely coeds, seated beneath a large campus fir, obviously were dressed for a special occasion. This one goes way back, but we've had good luck with many from early in the century. If you have an idea as to the identity of any of the comely quintet, write to Department of Information, Waldo Hall, Corvallis, Ore. 97331.*

*Everyone we've asked has one interpretation for this campus scene from yesteryear. There are dice down there on the pavement and, at left, we have a couple of losers. Naturally, that isn't it. But what is going on? Marbles? Mumbletypeg? If you have a hint write to the Department of Information, Waldo Hall, Corvallis, Oregon 97331.*

**T. W. Palmer** has been named to a newly created position of project business manager in The Dow Chemical Company's organic chemical department in Midland, Mich.

Mrs. Stan Simons (**Joan Hoonan**) and her husband have moved from El Paso, Tex., to Pendleton, Ore., where he is practicing ophthalmology.

Mr. and Mrs. **Frank Pellegrino (Lavelle Aubert, '58)** and two sons live in Stockton, Calif., where he works as manager of the Carnation Company plant.

Dr. **David R. Erickson** has been appointed general manager of edible fats and oils research for Swift & Co. in Chicago.

**Tom Hunt** works for Totolisor Company in Pasadena, Calif., but spends much time in Portland.

## 58

**Thomas R. Pickens**, North Salem High School dean of boys, was chosen outstanding young educator in Salem at the Junior First Citizen of 1969 banquet there recently. His wife is the former **Harriet Weinstein, '60**.

Maj. **Roger W. Rowan** is a missile combat crew commander with the 510th Strategic Missile Squadron at Whiteman AFB, Mo.

**Michael L. Healy** of Kirkland, Wash., left Dec. 13 for an expedition through the Caribbean and Mediterranean Seas on the research vessel of the department of oceanography, University of Washington.

Maj. **Charles L. Dougherty** has been decorated with his second award of the USAF Commendation Medal at Hill AFB, Utah.

Mr. and Mrs. **Frank S. Wright** have moved to Yakima, Wash., where Wright was transferred by the General Adjustment Bureau.

**Jack Gotta** is the new coach of the Ottawa pro football club in the Canadian Football League. Gotta had a long and successful career playing Canadian football and has been an assistant for several seasons.

LCDR **Richard Frederick** is serving as executive officer of the NROTC unit at Prairie View A & M College in Texas.

Dr. **C. David McIntire**, associate professor of botany at OSU, has been awarded a National Science Foundation Faculty grant and named a Fellow for 1970. He will study at the University of Washington.

**Eugene D. Kiel** of Corvallis received the "Man of the Year" award during the 1970 awards banquet for New York Life Insurance Co.

**David F. Pieper** has been promoted to vice president in the national division in Bank of America's San Francisco headquarters.

## 59

**Mac E. Heitzhausen** has moved to Portland where he has been named manager of the branch of U. S. National Bank at SW 3rd and Salmon Sts.

**Jim Harper** has been promoted to director of the Game Division of the Alaska Department of Fish & Game. He lives in Juneau.

**Robert Y. Hamada** and his family are living in Torrance, Calif., while he is doing graduate work at USC. Hamada is currently serving as president of the Los Angeles City Teachers of Mathematics.

**William A. Greene** is now a lieutenant on the University of California Fire Department squad.

**Les Porter** of Corvallis has been elected secretary-treasurer of the Oregon State Home Builders Assoc.

**Jay L. Wheelhouse** works in the management area for C & B Livestock, Inc., a custom feedlot for the feeding of cattle, in Hermiston, Ore.

Mrs. W. Bruce Lundeen (**Amy Baird**) of Richmond, Va., recently held a preview showing of her paintings, drawings and prints at a Richmond art gallery.

**R. Kirk Ewart** has been appointed administrative assistant for the timber and

wood products of Boise Cascade Corp. in Boise.

USAF Capt. **Lavern A. Willie** has been decorated with the Air Medal at Takhli Royal Thai AFB, Thailand. He is married to the former **Gladys L. Von Krosigk**.

## 60

**Gary Wayne Gleason** has been appointed a deputy district attorney for Multnomah County. He makes his home in Portland.

**Chet R. Gardner** and Barbara J. Van Altvorst, a University of Oregon graduate, were recently married. Gardner charts his fishing boat out of Depoe Bay in the summer, and headquarters on the Columbia River during the winter.

Dr. **Edgar Lee Stout** and his wife (**Janet Smith**) have moved to Bellevue, Wash., where Stout accepted an associate professorship at the University of Washington.

**James M. Goodrich** has been appointed executive officer of the Home Builders Association of Metropolitan Portland.

**Robert B. Bellamy** has been appointed assistant timber manager at U. S. Plywood's Oregon Division headquarters in Eugene.

**Wayne Schwieter** is a forester with Crown Zellerbach Corp. in Gresham, Ore.

**Darrell Fort** was recently accepted by the University of Oregon Medical School in Portland. He and his wife (**Sarah Carver**) are the parents of three children.

Maj. **Phillip H. Walker** was recently awarded the Silver Star, Air Medal, and the Distinguished Flying Cross. He is assigned to Warner Robins AFB, Ga.

## 61

USAF Capt. **Ralph E. Wyatt** is attending the Air University's Squadron Officer School at Maxwell AFB, Ala.

**Glenn C. Hedgpeth** and Priscilla K. Poole were married Nov. 15 and are now living at Butte Falls, Ore. Hedgpeth is timber management assistant on the Butte Falls district of the Rogue River National Forest.

USAF Capt. **John W. Christianson** is attending the Air University's Squadron Officer School at Maxwell AFB, Ala. He is married to the former **Lou Buck**.

Mr. and Mrs. **Ernest Harris (Shelly Stadheim)** have moved to Honolulu where he is working for Hawaiian Dredging and Construction, a subsidiary of the Dillingham Corp.

**Theodore Geredes** is now teaching engineering at West Valley Junior College in Saratoga, Calif. He lives in Los Altos.

**Stetson A. Gifford** has been named superintendent in the field controller's department at the San Fernando Valley, Calif., casualty and surety division office of Aetna Life & Casualty.

**Aaron Thomas**, tight end for the New York Giants, has quit professional football to take a seat on the New York Stock Exchange. Thomas has been associated with Goodbody & Co. the past two years and they promoted him to a general partner. He is married to the former **Jean Cairney**.

**Thomas O. Carter** is now a practicing attorney and is associated with the Portland law firm of Rask and Heffernan.

**Janice Kay Bendshadler** and Stanley F. Kilbourn were married June 21 and are now living in Salem.

**Dexter Zinke** is now employed as a financial analyst with the Kaiser Foundation in Portland.

**Constance Meyer** and Gerald L. Lydon were married Nov. 15 and are making their

first home in Tacoma. Lydon is an engineer with the Washington State Highway Comm., and his bride is a county extension agent.

**Capt. Thomas C. Cunningham** is in charge of the clinical chemistry section of Brooke General Hospital at Ft. Sam Houston, Tex.

**Barry F. Branin** recently became manager of construction and maintenance for retail marketing of Douglas Oil of California. Mrs. Branin is the former **Vivian Hope**, '63. They live in Manhattan Beach.

Mr. and Mrs. **Robert L. Basanich (Carolyn Church)**, '63) live in Seattle where he was recently elected vice president and sales manager of the Wholesale Fountain Supply Co.

**Stephen K. Jackson** has been appointed general manager for Taylor & Associates Advertising, Inc., in Portland. He and his family reside in Beaverton.

Mr. and Mrs. **Gary Edelbrock (Pat Merritt)**, '65) recently became parents of their first child, Laurie Anne. Edelbrock is director of financial aids, job placement, and housing at Mt. Hood Community College in Gresham, Ore.

**Peggy Cruickshank McGinnis** is taking advanced study in anthropology at the University of the Americas in Mexico City.

**Stuart Fors** is studying for a doctorate in health education at the University of Tennessee in Knoxville. His wife, **Kay Shearer**, '66, is teaching health in a junior high school there.

## 62

**Capt. Donald D. Sams** is a member of a unit at Sheppard AFB, Tex., that has earned the USAF Outstanding Unit Award.

Dr. **Benjamin J. Mason** has assumed a position in Las Vegas with Battelle Memorial Institute's Columbus Laboratories. He is a senior ecologist with the organization.

**Capt. Gary D. Lape** is attending the Air University and taking the academic instructor course at Maxwell AFB, Ala. His wife is the former **Paula Russell**.

**Richard A. Good** has been named public relations manager of the Georgia-Pacific Corp. Southern division. Division headquarters are at Augusta, Ga.

USAF Capt. **Wallace D. Cegavske** is an avionics officer assigned to McChord AFB, Wash. Mrs. Cegavske is the former **Janet Fisher**.

**James W. Bienhoff** is now a combination principal and teacher in the Willows Unified School District in Willows, Calif.

Lt. Cmdr. **Lawrence A. Bissonnette** of the USN was recently awarded the Silver Star Medal for gallantry in action in Vietnam. He now lives in Reseda, Calif.

**Capt. Harris W. Olson, Jr.**, stationed at Holloman AFB, N. M., is presently attending the Squadron Officer's School at Maxwell AFB, Ala.

Mr. and Mrs. **Stephen E. Hoag (Beverly Gardner)**, '63) have moved to Clatskanie, Ore., where he has taken a position as civil engineer with Crown Zellerbach Co.

**Gerald Wiese** is one of the three major stock holders of Real Estate Management Corp. in Corvallis. His wife is the former **Carla Myers**.

**James Henderson, Jr.**, is now credit manager of the home products division of General Electric in San Francisco.

Mr. and Mrs. **David W. Robare (Judy M. Brandt)** are living in Seattle where he is chairman of the division of science and

mathematics at North Seattle Community College.

USAF Capt. **Frankie E. Morris** is in a unit of the Air Weather Service at Kirtland AFB, N. M.

Mr. and Mrs. **Richard Rogers (Kathleen Marsh)**, who live near Philadelphia, have a new daughter, Erin, born Jan. 10.

## 63

USAF Capt. **Thomas Washington** has been decorated with the Bronze Star Medal at Bitburg AB, Germany, for meritorious service while stationed in Vietnam.

Mr. and Mrs. **Wesley E. Harrison** have moved from California to Bellevue, Neb., where he has taken a job with Engineered Systems, Inc., of Omaha.

**Capt. Peter A. Gordinier** of Perrin AFB, Tex., is a member of the 4780th Air Defense Wing that has earned the USAF Outstanding Unit Award.

**Frank C. Hametner** is now out of the Coast Guard and owns a hardware, furniture and appliance store at Arkansas Pass, Tex.

**Ross Cariaga** has been appointed an assistant football coach working with the line at Oregon Technical Institute in Klamath Falls. He has also been named head baseball coach there.

USAF Capt. **John M. Poorman** has received his sixth award of the Air Medal for air action in Vietnam. He is now assigned to the K. I. Sawyer AFB in Michigan.

**Rich Brooks**, assistant football coach at OSU since 1965, has moved to Los Angeles where he has accepted a job as assistant coach at UCLA.

Mr. and Mrs. **Francis Nekoba (Barbara Kibe)** live in Honolulu where he is currently assigned to the staff of the commander-in-chief of the Pacific Forces.

Maj. **Leonard N. Starr** has received the USAF Commendation Medal at McChord AFB, Wash. He was formerly assigned to McGuire AFB, N. J.

**David L. Garrison** is a lawyer working for Christensen, Sanborn and Matthews in Seattle.

Mrs. R. H. Bridenbaugh (**Judy Hauser**) lives in Washington, D. C., and teaches school in Rockville, Md. Her husband is completing his residency in psychiatry at Walter Reed Army Hospital.

*While the men are busily occupying themselves (see opposite page), the Oregon State coeds are at work in the Home Ec building, or so it seems. Who are these industrious girls? The only hint we have is that if these electrical appliances are as new as they appear, the year probably is 1929. Write to the Department of Information, Waldo Hall, Corvallis, Oregon 97331.*

**Charles K. Walters** is working as a biologist for the Oregon Fish Commission at Newport, Ore. His wife (**Jean Louise Prentiss**, '64) works as a dental hygienist.

**William K. Bryant** moved to Atlanta, Ga., last May where he serves as manager of operations analysis for the BP Oil Corp. He recently returned from attending a ten-week course in London at British Petroleum Co., Ltd.

## 64

USAF First Lt. **John E. Hale** is an electronics engineer with Headquarters San Antonio Air Material Area at Kelly AFB, Tex.

**Alan F. Nichols** has been appointed manager of the Kitimat Logging Division of the Eurocan Pulp & Paper Co. Ltd. He lives in Terrace, B. C., Canada.

USAF Capt. **Lloyd V. Howard** is a space systems operations officer assigned to Ent AFB, Co'o.

**Keith E. Grover**, agri-business representative for First National Bank of Oregon, has transferred from a regional assignment to the bank's Salem branch as general loan officer.

**William C. Goss** and his wife recently purchased the El Camino Pharmacy in Carlsbad, Calif.

**Dale D. Foresee** has been appointed marketing representative for Pacific Power and Light Company's Corvallis district.

**Jack Gallus** was recently promoted to vice president of the Kenton Packing Company and Oregon Chief Brand Meats.

**George Suter** has received a discharge from the U. S. Air Force and is now working for Northwest-Orient Airlines in Minneapolis.

**James Leonard** and **Sharon Bonds** were married Jan. 31 in Trenton, Mich., where Leonard is an engineer at Ford Motor Co., Transmission and Chassis Division.

U. S. Army Capt. **Johnny L. Lambert** is now living in Eugene where he recently began a tour of duty as assistant professor of military science at the University of Oregon.

**Lee Browning** is a civil engineer with the city of Anchorage, Alaska. He and his wife had a baby girl, Shelby Kay, born Dec. 29.

**John D. Beard** is a pharmacist at the Veterans Administration Hospital in Portland. He and his wife had a daughter, Joy Lynn, born July 4.

Mrs. Richard E. Weide (**Carol Primrose**) and her husband are living in Alexandria, Va., where he is serving as a dental officer at Ft. Belvoir. She is the coordinator of audiovisual services at Northern Virginia Community College.

**Kaye Mushalik** has returned from teaching military dependants in Germany and Okinawa and is now teaching elementary school in Sunnyvale, Calif.

Dr. **Francis X. Kamienski** has completed a post-doctoral fellowship at Harvard Medical School and accepted a position as senior research toxicologist with the Stauffer Chemical Co. in Richmond, Calif.

**Robert Cheney** has taken a new job as food chemist with the Pillsbury Co. in Minneapolis.

Cpt. **R. E. Thompson** has served in Vietnam and is now assigned to Ft. McClellan, Ala. His wife is the former **Edith Traylor**, '65.

Mr. and Mrs. **Roger W. Avrit** (**Karen M. Swartz**, '67) moved from Salem to Menlo Park, Calif., in August and became the parents of Bethany Kai on Dec. 10.

**David McEachen** was released from the Navy in June and is now working for Hamman, Miller & Beauchamp, insurance agents and investments in Long Beach, Calif. Mrs. McEachen was formerly **Judi Beauchamp**, '66.

**Stephen A. Hutchinson** is working as a deputy district attorney in Eugene. He is married to the former **Kathryn L. Morton**, '66.

---

## 65

---

Capt. **Rodney J. Schaer** has received the USAF Commendation Medal at Tan Son Nhut AB, Vietnam. He is stationed there with an Air Force Advisory Group.

**John H. Raudsep** is working as a mechanical engineer at Reynolds Metals Co. He and his wife (**Teddy Collins**) recently adopted a baby daughter to join their two-year-old son.

**Mary Heilmann** is now working at Vancouver Memorial Hospital as an assistant dietitian.

First Lt. **Robert B. Hardin, Jr.**, is on active duty with the U. S. Army at Ft. Monmouth, N. J. He and his wife (**Kristi S. Scott**) had their first child on June 19.

**William P. Haberlach** graduated from Willamette University College of Law in 1968 and is now attached to the Judge Advocate General Corps of the U. S. Navy at Seattle.

USAF Capt. **James E. Trost** has been decorated with the Bronze Star Medal at Camp Eagle Army Installation, Vietnam. He is stationed there as a weather officer.

**David Bystrom** has accepted a position as assistant director of pharmacy service at Grant Hospital in Columbus, Ohio.

**Ann Elias**, former office manager of the Robert Packwood state campaign headquarters in Oregon, will direct the 1970 federal census in Clark County, Wash., and Multnomah, Clackamas and Washington counties in Oregon.

**Robert Baldwin** is now in his third year of teaching literature and writing at Corvallis High School.

**Gilbert C. Schmidt** of St. Paul, Minn., is a pilot for Northwest Orient Airlines. His wife works as a bacteriologist for the Minnesota Department of Health.

---

## 66

---

Second Lt. **Lynn C. Robinson** has been awarded his silver wings upon graduation from USAF navigator training at Mather AFB, Calif. He has been assigned to McChord AFB, Wash.

Mr. and Mrs. **Gary H. Niemi** now live in Sitka, Alaska, where he has taken a job as project engineer for Alaska Lumber & Pulp Co.

Airman **Jon A. Metheany** has graduated from the medical services specialist course at Sheppard AFB, Tex., and is now assigned for duty at Wilford Hall USAF Medical Center, Lackland AFB, Tex.

## State Forestry Dept...

(Continued from page 4)

but also get increased growth in the trees remaining in the stand. Frequently the growth increase equals the amount of wood removed in the partial cut.

Experiments in fertilization and irrigation show promise for further increasing growth in the future.

Survey, road construction, timber inventory, timber sales, and land exchanges are all under the supervision of State Forests Director **William Phelps**, '41. A training course in watershed management and protection was recently offered to department personnel by his section.

Services Division Chief **Donald Maus**, '42, directs the operation of the purchasing section as well as the motor pool and the Radio Section already mentioned. Also within his division are the Insect and Disease Control, Mapping, and Air Operations sections.

### Insects and disease are major problems

The Insect and Disease Section keeps tabs on the state forest insect problem by means of a co-operative annual aerial survey with the U. S. Forest Service of the entire state. The results of this survey are relayed to district offices and used in planning timber sales for salvage logging. It also alerts for-

esters to any sudden insect population expansion which might call for an intensified control program.

At present the best defense against forest insect epidemics is to remove damaged or weakened trees that serve as breeding grounds.

Without the Mapping Section and the accurate maps it produces the forester's job would be much more difficult if not virtually impossible. **Lyle Beyers**, '31, oversees the map mapping.

Assistant State Forester Jack Campbell runs the Administrative Division without which no large organization can function.

According to Personnel Director **James Fisher**, '56, more than two thirds of the department's 110 professional foresters are graduates of the OSU School of Forestry.

### OSU "best forestry school in nation"

He feels OSU has the best forestry school in the nation for preparing foresters to work in the Northwest. Even so, he says, there is real strength in having foresters from other schools and other parts of the nation as well to get a better mixing of ideas.

It would probably be safe to say that most of the department's foresters grew up in Oregon, were educated in Oregon, and just never saw any reason to leave.

First Lt. **Robert J. McKittrick** has been decorated with the USAF Commendation Medal at Keesler AFB, Miss.

**Kenneth C. O. Hagerty** and Karen E. Schoepfer were married in Wellesley, Mass., last June. They are living in Arlington, Va., while the bridegroom works for Congressman D. G. Brozman and is in his final year of law school at Georgetown University.

Mr. and Mrs. **Edward D. Hansen (Marjorie J. Liesegang, '65)** became the parents of a son, Eric Matthew, born June 6. Hansen is group leader in the pulp laboratory at Crown Zellerbach in West Linn, Ore.

Capt. **Michael W. McGuire** is serving with a unit of the Pacific Air Forces at Tan Son Nhut AB, Vietnam.

Capt. **Ronald W. Mammen** is an electronics warfare officer stationed at Beale AFB, Calif. Mrs. Mammen is the former **Cynthia Hall, '67**.

**Chris L. Hadley** is now employed as a research development engineer at Vostron Industries in El Toro, Calif. His wife (**Virginia Ives, '67**) is taking graduate studies at the University of California at Irvine.

Army Capt. **Morrie E. Larsen** recently received the Bronze Star Medal near Da Nang, Vietnam. His life is living at La Puente, Calif., during his absence.

**Richard A. Yunker** is a forestry engineer for the Simpson Timber Co. in Shelton, Wash.

**Horton L. Fross** has been named director of advising and student services in the School of Humanities and Social Sciences at OSU.

USAF Capt. **Alvin L. Osborn, Jr.**, has received his fifth and sixth awards of the Air Medal at Fairchild AFB, Wash., for air action in Southeast Asia.

Mrs. **Madeline E. Porter** is now an assistant professor in home economics at the University of Puget Sound in Tacoma.

**James W. Waltz** is presently working as a pharmacist at Tiffany's in Eugene.

**Bonny Gathercoal** is stationed in New York City while flying with Pan American. She enjoyed a flight around the world in October.

Capt. **David Blake Beckham** is the chief of the Personnel Services Division of the 32nd Army Air Defense Command in Kaiserslautern, Germany. Mrs. Beckham is the former **Cheryl Anne Morrison, '67**.

**C. Ron Aarts** has been separated from the service and accepted a position as manager of a marine electrical contractor's branch office in Seattle. He and his wife (**Margie Gunter**) have been living in San Francisco.

Lt. D. **Allan Staley**, formerly of Grants Pass, is presently serving in Vietnam.

## 67

First Lt. **Terry L. Millard** is a member of a USAF combat wing that has been awarded the Presidential Unit Citation at Tuy Hoa AB, Vietnam.

Sp 5 **Gordon F. Teifel** has been promoted as a public information specialist and is now assigned to Ft. Sill, Okla.

Army Staff Sergeant **James L. Dolby** has been serving with the First Logistical Com-

# Staters In the News

**Melvin T. Nygaard, '57**, was named Portland's Junior First Citizen for 1969.

A certified public accountant and past president of the Portland Junior Chamber of Commerce, Nygaard's selection was made jointly by the Portland Jaycees and a group of local businessmen.

A partner in the firm of Wilson, Medlar & Twietmeyer, Nygaard is director of finance for the Oregon State Jaycees and serves on the board of directors of the Portland Chamber of Commerce.

A native of Bemidji, Minn., Nygaard is presently director of the Portland Presidents Council.

Gov. Tom McCall appointed him to his advisory committee on dental health and to the citizen's advisory committee to assist the Harbor Drive Parkway Task Force. Last year he served on the mayor's committee on decent literature and films.

**Donel J. Lane, '40**, has been appointed to be the chairman of the Pacific Northwest River Basins Commission by President Nixon.

Lane, former director of the Oregon State Water Resources Board, succeeded Charles W. Hodde in the post. Lane had been the state's water resources director since the board was established in 1955.

The river basin commission is charged with coordinating state, federal, local and private activities to develop a comprehensive water and related land resources plan for the Columbia Basin.

Commission membership, in addition to the full-time chairman, is composed of state water board representatives from five northwestern states and department heads of several federal agencies.

Nygaard, '57

Lear, '38

## Gene M. Lear, '38

Oregon State University associate dean of Agriculture and director of Extension, **Gene M. Lear, '38**, has been appointed associate administrator of the Extension Service of the U. S. Department of Agriculture.

Lear, who has headed the University Cooperative Extension Service since 1961, assumed his new duties in Washington, D. C., June 1.

As associate administrator of the USDA Extension Service, Lear will have major responsibility for guidance of national programs in agriculture, home economics, 4-H and youth and rural development.

Lear started his career with the OSU Extension Service in 1939 in Wasco County. He then served in Umatilla and Deschutes counties before coming to Corvallis in 1956.

Currently serving as secretary of the National Extension Committee on Organization and Policy, Lear has been active on a number of regional and national committees. He is a past chairman of the Western States Extension Directors.

A native of Kansas, Lear received a master's degree in public administration from Harvard University.

mand near Long Binh, Vietnam.

Mr. and Mrs. **Millard A. Harris (Maryla Gustafson, '69)** are living near San Francisco where he is employed as senior product cost engineer for Crown Zellerbach Co.

First Lt. **Raymond A. Clark**, an avionics officer at Hamilton AFB, Calif., is a member of a unit that has earned the USAF Outstanding Unit Award.

Seaman **Robert C. Heald** of the U. S. Naval Reserve has finished basic training at the Naval center in Orlando, Fla., and has reported for duty in Norfolk, Va.

**Clifford R. Hamilton** received his masters degree in conservation education from Michigan State University and is now employed as a biologist by the Oregon Game Commission. He lives in Beaverton.

USAF First Lt. **LaRay Harmon** is a navigator in a unit of the Pacific Air Forces at Udorn Royal Thai AFB, Thailand.

Dr. **Ronald G. Brenchley** is now supervisor of the market development department of Monsanto Corp. in Fremont, Neb.

**Paul A. Pulliam** has been appointed to head the installment loan department of First National Bank of Oregon's Corvallis branch.

First Lt. **Michael E. Gillespie** is a member of the unit at Cape Lisburned AFB, Alaska, that has earned the USAF Outstanding Unit Award.

Mr. and Mrs. **John T. Wortendyke (Lynn M. Jackson)** are living in Belleville, Mich., while he works for a master's degree at the University of Michigan under the U. S. Forest Service program.

**James C. McCall** obtained his masters degree at the University of Michigan in mechanical engineering and is now working for Whirlpool Corp. in St. Joseph, Mich.

Mr. and Mrs. **Terry G. Aman (Sally Ann Bigei)** are living in Del Rio, Tex., while Aman is attending USAF pilot training school. Mrs. Aman is substitute teaching there.

Second Lt. **Jeffrey C. Graham** has graduated at Sheppard AFB, Tex., from the training course for USAF accounting and finance officers.

**Donald A. Albertson** is employed as an engineer at the Hyster Co. in Portland.

Mr. and Mrs. **Melvin E. Smith (Linda Kay Engle)** are living in Eugene while Smith attends law school at the University of Oregon. Mrs. Smith teaches at Bethel Junior High School there.

**Judith Lynne Derfler** and **Michael Gene Bowers** were married in June at the Westminster United Presbyterian Church in Salem. They are making their home in Roseburg where both are teaching.

**Ward S. Conger** is currently in pilot training at Williams AFB, Ariz.

**Junene A. McNaughton** lives in Rochester, N. Y., where she is working as a food technologist for the R. T. French Co.

Capt. **George J. Dooley III** is a research scientist with the Aerospace Research Laboratories at Wright-Patterson AFB, Ohio.

Second Lt. **Thomas N. Neeley** received his commission upon graduation from OTS at Lackland AFB, Tex., and is now assigned to Laughlin AFB, Tex., for pilot training.

Airman **Michael Eyer** is serving in Vietnam as an English language instructor following graduation from the Defense Language Institute in Texas.

**Donald J. Decker**, graduate student of exploration geology at the Mackay School of Mines, University of Nevada, has been selected as a scholarship recipient by the Bear Creek Mining Co.

Second Lt. **Dale Price** of the U.S. Army is currently serving in Germany.

**James F. Girt** is presently a physical therapy student at the Mayo Clinic in Rochester, Minn.

## Arrivals

To Mr. and Mrs. **Lawrence Gibson**, '58, a son, Greg Steven, Mar. 7, 1970, in Portland. He joins brothers Jeffrey Scott and Mark Lawrence.

To Mr. and Mrs. **Ronald E. Johnson**, '62, (**Roberta Kallgren**, '70), a son, Robert Russell, Oct. 30, 1969, in Norfolk, Va.

To Capt. and Mrs. **Robert E. Jones**, '64, (**Jan E. Kovenz**, '65), a son, Erik Kerr, Nov. 14, 1969, in Wichita, Kan.

To Mr. and Mrs. Lawrence Kirkham (**Judy Tower**, '64), a son, Christopher Lawrence, Nov. 18, 1969, in Freeport, Bahama Islands.

To Mr. and Mrs. **Charles S. Schippers**, '64, a daughter, Feb. 19, 1970, in Portland.

To Mr. and Mrs. William Ross Turman (**Patricia Mallory**, '65), a son, David Ross, Sept. 26, 1969, in Central Point, Ore.

## Marriages

**Patricia Anne Turk**, '66, to Jerry L. Matthews, Oct. 18, 1969, in Portland.

**Karen Sue Davis**, '66, to David Lawrence Steele, Nov. 22, 1969, in Corvallis.

**Janice Mae Valentine**, '68, to **Robert O. Beckham, Jr.**, '68, Mar. 28, 1970, in Corvallis.

**Dixie Lee Webster**, '68, to Ralph E. Taylor, Jr., Jan. in Idaho Falls, Idaho.

**Susan Joy Kruchek**, '68, to **William Kyle McNeal**, '68, Feb. 14, 1970, in Portland.

**Nancy Ellen Clifton**, '68, to **Daniel Gregory Greene**, '68, Feb. 14, 1970, in Portland.

**Elizabeth A. Dudley**, '68, to Stanley Sears, October in California.

**Christina Lynne Hubbard**, '69, to **Steven Littell Schetky**, '69, Dec. 20, 1969, in Portland.

**Christina Lynne Hubbard**, '69, to **Steven Littell Schetky**, '69, Dec. 20, 1969, in Portland.

**Charlene Clopton White**, '69, to Jan Christian Brown, Jan. 25, 1970, in Portland.

**Jacqueline Ann Lewis**, '69, to **Jon Sandstrom**, '69, Dec. 29, 1970, in Albany, Ore.

**Anne Marie Lemke**, '70, to **Alfred A. Rasmus**, '69, Dec. 6, 1969.

## In memoriam

**Alva A. Newton**, '97; Feb. 27 in Corvallis.  
**Emil Raymond Price**, '04; Mar. 7 in Corvallis.

**Merrill Bruce Moores**, '05; April 9 in Palm Springs, Calif.

**Frances Alva Aitken**, '10; Mar. 18 in Portland.

**Minnie Diven Ewart**, '10; April in Mesa, Ariz.

**Lenora Makelim Levan**, '11; April in Portland.

**Charles Claude Thompson**, '11; Mar. 31 in Central Point, Ore.

**Cap Howard Tuttle**, '11; April in Summer-ville, Ore.

**D. S. "Cy" Young**, '11; Feb. 25 in Sherwood, Ore.

**Bertha Booth Burns**, '14; April 7 in Seaside, Ore.

**Lois Wilson Neer**, '14; April in Salem, Ore.

**Harry A. Binzer**, '17; April in Bellingham, Wash.

**Faith Hanthorn Mires**, '17; Dec. 25 in Laguna Hills, Calif.

**Everett Wortman**, '17; Mar. 17 in Portland.

**W. Frank Miller**, '18; Feb. 26 in Palm Springs, Calif.

**Elta Wagner Davidson**, '23; October in Boise.

**Francis Alonzo Porter**, '23; Feb. 18 in Forest Grove, Ore.

**Clark Floyd Brooks**, '24; April 8, 1969, in Hazelton, Idaho.

**Myrl Miller Williams**, '25; Sept. 13 in Bethesda, Md.

**Mary Little Steinkamp**, '26; Dec. in LaJolla, Calif.

**Edward Lawrence Ryan**, '27; Dec. 22 in Eugene.

**Charley Devers Thompson**, '27; 1969 in Vancouver, Wash.

**Peter Thomas Sinclair**, '28; April 7 in San Francisco.

**Lawrence F. Schmitt**, '29; March in San Mateo, Calif.

**Lloyd V. Baker**, '31; May 23, 1969, in Redmond, Ore.

**Dorothy Jean Druschel**, '33; Mar. 12 in San Francisco.

**Marjorie Canessa DuBois**, '33; April in Portland.

**Alfred Jacquot**, '33; Jan. 30 in San Gabriel, Calif.

**Carl Grover Wilson**, '33; 1968 in Los Altos, Calif.

**Terrell Walters Johnson**, '34; Mar. 10 in Portland.

**Astor Loback**, '34; April in Los Angeles.

**Frank Joe Kamarad**, '35; Dec. 24 in Tahoe Valley, Calif.

**Jack Logan Medlar**, '37; April in Portland.

**J. C. (Jack) Stevens**, '38; Mar. 29 in Portland.

**William Fredrick Meyer**, '40; March in Seattle.

**John Francis Skibinski**, '40; Mar. 2 in Portland.

**Roland Richard Bell**, '42; Feb. 11 in Portland.

**Wilma Watkins Cripe**, '43; Mar. 26 in Portland.

**Margaret Mildred McCulloch**, '43; April 3 in Corvallis.

**Lewis William Beck**, '50; April 3 in Great Falls, Mont.

**John S. Boyce**, '58; April 18 in San Jose, Calif.

**Neil J. Lasater**, '58; April in Portland.

**Odice McDaniel**, '66; April in San Antonio, Tex.

**Lawrence Day Greef**, '67; Aug. 12 in Vietnam.

**Randy Bruce Hammer**, '67; Mar. 30 in Portland.

**Stephen Arthur Golsh**, '68; Mar. 21 in Vietnam.

## Faculty

**Charles Albert Henderson** (OSU, '16); Oct. in Klamath Falls.

**Anaita Jurgenson**, April in Corvallis.

**Adelaide Valeta Lake** (OSU, '42); April 10 in Eugene.

Dr. **Hector MacPherson Sr.**, Mar. 27 in Albany, Ore.

**Cairns K. Smith**, Mar. in Calgary, Canada.

## Dr. C. K. Smith, "no ordinary teacher," dies

Dr. Cairns K. Smith, Oregon State history professor from 1945 to 1968, died recently in Calgary, Canada.

Dr. Smith's official honors and popular student acclaim over the 23 years he was professor at OSU made him one of the university's all-time most distinguished teachers.

Many alumni will be interested to know that, as a memorial, the School of Humanities and Social Sciences has established the Cairns K. Smith Award for Inspirational Teaching and those wishing to support this memorial should send their contributions to the OSU Foundation.

Following his retirement from the OSU history department in 1968, Dr. Smith spent a semester as a teacher on the Chapman World Afloat cruise and returned to his native Canada last summer to become professor of history at the University of Calgary.

In 1957 he was given a university-wide award as an outstanding teacher. He was cited in 1963 as "OSU's most inspiring teacher" and in 1966 Dr. Smith was among the Mosser Award winners for outstanding classroom performance.

Dr. Smith graduated from the University of Saskatchewan and received his master's degree from Minnesota and his Ph.D. from Chicago. He taught at Ohio State and Oklahoma before coming to OSU.

The spring 1968 edition of "Improving College and University Teaching," published at Oregon State, devoted five pages in tribute to Dr. Smith, "No Ordinary Teacher."

# Report from alumni headquarters

The response to the questionnaire that appeared in the Winter issue of *Oregon Stater* has been excellent. Something over 200 replies have been received and transmitted to the President's Commission on University Goals. It seems to me that the Commission will get a message. Our thanks go to those who made the effort to reply. No one seemed to be bashful and that is all to the good.

The overall results are not in a form that can be computerized. The more common comments about the "best features" included:

A most friendly campus atmosphere.

Dedicated faculty who would go out of their way . . .

A pride in the University and its goals.

The atmosphere that encouraged self discipline.

The "worst features" comments included:

The weather.

The grosbeaks. (They still arrive about April 15 and stay for 30 days.)

Lack of money.

Not enough time for more electives.

Inadequate teachers.

The class years represented were from 1917 to 1969, and came from all over the U.S.A. and from several foreign countries.

The overriding concern of most of the replies and other recent correspondence involved such thoughts as: "Hold the line," "don't let it happen at Oregon State," and "throw the rascals out."

A message from C. H. "Scram" Graham,  
Director, Alumni Relations

At the spring term meeting of the Association's Board of Directors, a Legislative Committee was named. Its primary function will be to help members of the Oregon legislature develop ways and means to strengthen the hand of the institutional executive. Situations have not been helped by the delays and vacillations of officials in enforcing existing laws and in supporting the principles of democratic government which provide for the handling of anarchy and the irresponsibility of campus disruption.

As this is written, in mid-May, the ongoing programs at Oregon State have not been interrupted as they have been at several near-by schools and across the nation generally. This has to be a compliment to the students, faculty, administration and in not a small measure to alumni and particularly to those good alumni-parents who have let their thoughts be known. Your letters of encouragement have helped to keep our general attitude in gear.

In closing, let me remind you of the OSU Fund, the annual giving program of the association. The fiscal year ends June 30, 1970, and I must tell you that the contributions are lagging behind last year. If you have contributed this fiscal year you can tell what our records show by looking at the numbers to the right of your address on the magazine. One is a serial number, another is your class year, and the third is your giving status. Life Members will show an "A." A 1, 3, or 4 indicates something else, but you're still a good guy or gal. Contributors for '69-'70 will have a "C" following any of the four categories. If you have a "Z" after the A, 1, 3, or 4 then you are (excuse the expression) a "GLYBUNT." That means you "gave last year but not this." Don't be one of those, please. Won't you consider sending a check to 104 M.U. made out to the OSU Fund? It would be appreciated sincerely.

SCRAM

*"George W. Peavy . . . first dean of OSU's world-recognized School of Forestry . . . Oregon State president for six years after 25 years as forestry dean . . . member and leader of the State Board of Forestry from 1911 to 1941 . . . mayor of Corvallis from 1947 until his death in 1951 at age 82 . . . direct, dynamic and definite always but kindly and fiercely fair also . . . he towered among men as do some giant majestic trees in the forests . . . a dreamer, yes, but a doer as well who helped make forestry a great profession and Oregon State a great institution of higher learning."*

—from Charter Day Citation, 1969
