*Marc Corwin Is New Alumni President*

I recognize all five of the men in the picture but their names have completely slipped my mind. The middle one's name is Fred Sugnet and the one to his right is McGinnis, the player on the extreme right end was not in college when I was there but I remember the players speaking of him. He is the son of a famous polo player from Santa Barbara and went to Oregon State to play polo. After polo was dropped there he left and went to some other school.

Now, to get down to the history of polo—the first collegiate game was played on October 20, 1923 with Stanford University. Oregon State won the first game 10 to 4 and lost the next two, 4 to 8 and 3 to 6. O.S.C. later played Portland Hunt Club that same year on one of the golf fairways in Portland and won 5 to 4. In 1924 the O.S.C. Polo Club was organized, (I had the pleasure of being the first secretary), to assist in promoting polo at Oregon State. I have forgotten the balance of the officers but I do know that John Kenny, who is now a colonel in the army, was president one year—whether it was 1924 or 1925 I do not know. We played Stanford on March 19 and 20, 1925 and lost 3 to 13 and 0 to 11. The team that went to Stanford was composed of Jalmar Koski, with whom I have lost contact, John Kenny, of whom I spoke before; Fred Bacher, who is a colonel in the air corps, the last I heard of him he was stationed in the Philippines; Fred Kellaway and myself. We paid our own expenses and rented an old Star automobile to go down to Palo Alto.

Later in the spring, Stanford came to Corvallis and played the Oregon State team, the score being 5 to 6 in favor of Stanford. The next year, i.e. the 1925-26 school year, the team traveled to the University of Arizona at Tucson, stopped at Stanford on the way and played them, Oregon State winning 8 to 2. We played Arizona on December 22, the score being 11 to 3 in favor of Arizona and on the 28th of December the score was 8 to 3 in favor of Oregon State.

The third game, on December 30, ended 4 to 13 in favor of Arizona. On January 2 we again played Stanford, the score being

6 to 2 in favor of Oregon State. The team that went to Arizona consisted of Harvey Dick, Leo Beckley, who the last time I heard of him was an editor of a paper in Washington; John Kenny; Fred Bacher and myself. We again played Stanford in the spring. I have forgotten the scores and didn't put them down.

During the school year 1926-27 we traveled to Stanford again at Christmas. However, I do not have the scores, although we played them at least two games.

In the spring of 1927 Oregon State held the first intercollegiate round robin polo tournament at Corvallis, at which Stanford, Washington and Oregon State were represented and it seemed to me Oregon also played. The main players during that year were John Hardie who, as you will remember, was killed by the Huks in the Philippine Islands; John Henderson, who is working for the State of California and is stationed at Sacramento; John Kenny; Leo Beckley; Joe Gault from Corvallis; Lawrence Nolte and the fellow who is second from the left in the photograph in your article, and me.

As I remember, the Oregon State team won the round robin matches.

We later played Portland Hunt Club and the Seventh Infantry polo teams at Vancouver after the school year was out, the team being Beckley, Henderson, Kenny and Huffman.

I have lost track of the members of the team of 1927-28 due to the fact that I graduated the year previously, but I do know that John Henderson was captain of the team and that they went to Salt Lake City to play the Utah University, as well as going to Stanford.

Incidentally, in 1927 when we went to Stanford, the army furnished us an old reconnaissance car for transportation.

In 1932 or 1933 OSC took their horses to Palo Alto and played a series of games with Stanford, this being the first time the team ever took horses that far.

These are all the facts that I have a record of and I thought it might be well to record them at this time in some place where they might be kept for a permanent record.

FRANK L. HUFFMAN, Modesto, Calif.

On page 22 of the May, 1952 Oregon Stater is a polo picture. I am on the left side, number one position. . . .

## The Oregon Stater

Editor—TED CARLSON, '50.

ADVERTISING REPRESENTATIVES: The American Alumni Council, 100 Washington Square East, New York 2, N. Y.; Duncan A. Scott & Co., Mills Building, San Francisco, Calif.; Duncan A. Scott & Co., 2978 Wilshire Blvd., Los Angeles, Calif.

THE OREGON STATER is published monthly except July, August and September by the Oregon State College Alumni Association at 104 Memorial Union Building, Corvallis. Entered as second-class matter at the Post Office at Corvallis, Oregon, October 1, 1940, under the Act of March 3, -1879. Annual dues of the Association are \$4 which includes a year's subscription to THE OREGON STATER.

## The Cover . . .

This is close to the mid-point of summer vacations for several thousand OSC students. Now they are beginning to wonder how time can go so fast. Scarcely touched are all those plans they made for these three glorious months. One such Stater, Gayle Juve, '53, this month's cover girl, pensively reflects on what the remainder of the summer holds for her.

Gayle finished her training at OSC this spring and will enroll at Oregon College of Education this fall. This will complete her work under the new joint degree program in elementary education, teacher training. On graduation next spring she plans to travel in Europe before going into nursery school work. (Cover photo by Dick Gilkey, '51.)

## *It's Fun to Reminisce at*

Saturday, June 7, reunion day on the OSC campus, turned out to be excellent in every respect.

First, the day was perfect, sunny and warm. Second, a wonderful turnout of alumni from all over the United States gathered on the campus to participate in their reunions. Third, many of the alumni got a chance to see the Pacific Coast champion Beaver baseballers subdue Fresno State for the NCAA regional title and the right to play in the national collegiate baseball tourney in Omaha, Neb.

The three classes, 1902, 1912, and 1927, each met separately during the day in luncheons and then gathered together that evening for the annual alumni reunion banquet.

### 1902 Class

The '02's held their reminiscing at a luncheon in the Memorial Union tearoom. C. W. Laughlin acted as master of ceremonies and each class member spoke five minutes on their activities during the past years.

Ralph Shepard recited his poem he wrote many years ago entitled "An Old Grad Comes Back." John Gallagher, '00, officially welcomed the '02 class members into the Golden Jubilee association. John Smith was then elected president of that association.

Class pictures were taken after the luncheon and then a reception was held at the

Corvallis home of John Smith. In the evening the class of 1902 attended the alumni banquet.

### 1912 Class

A big turkey feed highlighted the picnic lunch of the class of 1912. Gobbler Grower Jay Leedy supplied the turkeys at the luncheon held at the home of OSC Professor Fred McMillan. Special guests were President and Mrs. A. L. Strand and Dean of Administration and Mrs. E. B. Lemon.

At 1 p.m. the members of the class watched the Orange and Black baseball team beat Fresno State college 8-4. Immediately after the game, class members gathered at the coliseum where the Otto Sitton memorial plaque was placed.

### 1927 Class

Luncheon for the 1927 class was held at the Corvallis Country Club. Allan Reid

called the meeting to order and introduced Vern Hawn who acted as master of ceremonies.

A series of honors and awards were given out to various class members. Forest Palmer and Almira Jacobson Aton received prizes for coming the longest distance. Palmer's home is in Poughkeepsie, N. Y.

Burton Hutton was selected as the man retaining the most hair of natural color. Helen Gill and Kay Critchlow were both awarded the distinction of the lady with the best figure. Jim Dixon, Wes Schulmerich, and Alumni Director Bob Knoll deliberated a long time on this award.

For the class member with the most children attending or graduated from OSC the Byron Taylors, the Freeman Fikes, the William Ruggles all tied with two each. Rex Brumbach walked away with the prize for the class member having the most chil-

# REUNIONS

1902 REUNION, left to right, Myrtle Billings, Ina Pearl Allen, Stella Tartar, Maud Mattley, Edith Houck, Rachel Tulley, Abbie G. Stites, Maude Sturgeon, Dedie Lusted, Mrs. William Van Groos, Gertrude McElfresh, Orla Stimpson, A. E. Tulley, Herman Tartar, Roy Howard, John E. Smith, Ralph Billings, James Scott, Harry Lusted, C. W. Loughlin, Ralph Shepard, Noble Leadbetter, William Van Groos.

**GOLDEN JUBILEE**, left to right, Ina Pearl Allen, Martha Fulton, John Fulton, Etta Howard, Gertrude McElfresh, Abbie Stites, Stella Tartar, Rachel Tulley, Myrtle Billings, Mrs. John Starr, John Starr, Bertha Davies, Leah Buchanan, Bess Michael, Sibil Loughlin, Orlo Stimpson, Maude Sturgeon. Second row, Ted Tulley, Mrs. William Van Groos, Dedie Lusted, John Howard, Edith Howard Houck, Roy Howard, Ralph Shepard, Edith Bonge, Eva Peters, Thomas Wilkes, Florence Wilkes, Noble Leadbetter, William Van Groos. Third row, Maud Mattley, Alice Kutch, W. F. Holman, Fanny Wickman, Laura Smith, Esther Glass, Ralph Billings, John E. Smith, Maud Edwards, Harry Lusted, C. W. Loughlin, Arthur Wood, John McCormick, Lena Belle Tartar, Mark McCallister. Row four, John Gallagher, Robert Gellatly, Carle Abrams, Jack Kilpack, Grant Elgin, Herman Tartar, J. W. Edwards, Lizzie Bowerman.

dren. Brumbach, from Walla Walla, Wash., had a grand total of nine children ranging from 22 years of age down to a two month old baby. Irvin Barklow had five grandchildren and won that division's prize.

Forest Palmiter took his second prize of the day by being the class member who looks most nearly like he did in 1927. The most distinguished looking class members were Jean McDaniel and Wes Schulmerich. Although it must be noted that in the case of "Iron Horse" there were heard shouts of "fraud."

Burton Hutton was chosen as permanent class treasurer and Mrs. Herb Nelson and Mrs. E. A. Yunker were selected as permanent secretaries.

Ending the luncheon, the class of 1927 voted to hold its next reunion in five years in June of 1957.

#### Alumni Banquet

The Memorial Union ballroom was filled to overflowing Saturday night with all alumni gathering together to hear short speeches by a representative member of each of the reunion classes. President Strand was the principal speaker for the evening and Dean of Men Dan Poling acted as toastmaster.

Dr. Herman Tartar, '02, spoke for the 50 year class and said "ours was a small class . . . only 32. Coming to college from the small towns and farms was a very broadening experience," he said.

Dr. Tartar related how in the days of the '02 class, board and room was \$2 a

week. In those days, he said, the students had close contact with the teachers. Dr. Tartar ended with the statement that they had a "hopeful outlook for the future."

Professor Fred McMillan, head of the OSC department of electrical engineering, was the spokesman for the '12 class. Professor McMillan reminisced and declared that "OSC prepared us to meet the practical problems."

For the 1927 class Burton Hutton said that the '27 class has been dedicated to service and suggested that the class would always face in the right direction so that "if we stumble, we can at least stumble forward." Hutton reaffirmed the declaration of the class of 1927 that it was "on the threshold of expanded service."

Class president Allan Reid presented the will to Alumni Director Bob Knoll to pre-serve in the Alumni office until the next class reunion in 1957.

#### Strand Speaks

Principal speaker President Strand gave a report on campus activities and the outlook for Oregon State.

"Alumni days are pleasant days on this campus," he said. Strand compared the College to a tapestry, where one can go back into the tapestry and find experiences, bright spots, and failures. "There is no end to this tapestry," Dr. Strand said, "it keeps on growing."

Strand's report of the campus showed that the College was looking ahead to the future. "It isn't hard to see new buildings

. . . but there is much underneath . . . that represents quite an investment." He was referring to the extensive alterations to the physical heating plant.

The next building to go up will be the chemical engineering building, Strand said. About the football stadium, President Strand commented that "we want to stay on the campus" to play the football game. A sum of \$25,000 to \$30,000 is needed to possibly start construction in August or September when the digging conditions are right.

President Strand told the assembled alumni that the College was looking ahead to see the increased student enrollment caused by the high birthrate during the late '30's and early '40's. Touching on other College affairs, the tall, lean educator said that retirement of faculty was heavy. Salary increases will be needed for the College staff, and that no decision has yet been reached on a home economics dean.

He said the greatest change in the campus since the alumni used to attend OSC was the "relationship to foreign countries." Dr. Strand said that he thought this exchange of students and ideas with other countries was one of the most broadening experiences in OSC's educational realm. He ended his review of campus affairs by stating that "the strength of the tapestry which is OSC depends on your interest in the institution."

To wind up the evening Warren Reid, '34, presented outgoing alumni president Ralph Floberg a golf cart and new alumni president Marc Corwin was introduced and spoke briefly.

**1912 CLASS**, left to right, first row, Caryl Edwards Kyle, Maida Beals Walton, Gertrude Lilly Flannery, Edna Harris Laws, Olive Pohland Wolcott, Florence Starbird Turlay, Cecil Dodd Brown, Alice Leedy Young, Jennie Totten Jess, Willard Mitchell Lampert, Nell Sykes, Pearmine, Cuba Amick Paine, Minerva Kiger Reynolds, Mabel Moeck Wilant, Elizabeth Koeber Hubbard, Hasel Edwards Thompson, Ruby Elliott Breithaupt. Second row, Fred O. McMillan, Dick Fendall, Charles E. Sitton, Chester D. Lafferty, Shamus O'Brian McFadden, Robert A. Cook, Alfred Volck, Fred Grant Brown, Clark E. Schultz, Charles V. Darling, Basil Witzig, Wilbur D. Andrews, Ralph McCulloch, Julius Spees, Jac C. Leedy, Fred E. Plympton, Vane G. Gibson, William R. Varner, Earl W. Heckart.

**BOTTOM LEFT**, Dr. Herman V. Tartar prepares to address assembled alumni at the annual alumni banquet June 7. Dr. Tartar represented the class of 1902. **Bottom right**, Outgoing Alumni Association President Ralph Floberg and E. E. Wilson, class of 1889, get together at the banquet table.

# GRADUATION

## REID IN NEW JOB

## STADIUM TO START THIS SUMMER

The Oregon state board of higher education June 17 approved the start of Oregon State's football stadium. A sum of \$94,330 is ready for field construction, planting, drainage, excavation, stabilization of cut and fill slopes. This work will begin this summer.

The proposed stadium will be located south of the coliseum and the first unit will seat 22,000. Bleacher seats now on Bell field will be used to reach this total. Dr. Strand, at the board meeting, said the stadium will probably not be far enough along for use until 1954.

The active stadium campaign is being wound up with a special solicitation underway in Portland and in a few other communities. From these it is expected that funds sufficient to complete the first two units will be raised. Lynn Sabin, former president of the Alumni Association, is heading up the special solicitation in Portland.

Whether or not additional active solicitation will be continued in the fall months during football season depends upon the success of the campaign now underway. However, Mr. Parker emphasized the importance of county committees and leaders continuing their solicitation "until every Oregon Stater in Oregon has been given a personal opportunity to help in this important project."

### HEADS ALUMNI

MARC CORWIN, '39, was elected president of the Oregon State Alumni Association at the June board of director's meeting. He succeeds Ralph Floberg, '41. Marc lives in Eugene and is affiliated with the Burroughs Adding Machine company.

With the announcement of the closing of the Portland Stadium Fund office came word that Warren A. Reid, '34, who has been managing the Fund campaign for the past year, had become associated with Jantzen Knitting Mills of Portland. Reid will leave Portland in late August with his family to take up his duties as sales representative for Jantzen in Pennsylvania. His territory will include a part of eastern Ohio and western Pennsylvania.

Prior to his association with the Stadium campaign, Reid had been engaged in the life insurance business with the Mutual Life of New York as an underwriter and assistant manager following his discharge from the navy in 1945. He was a leading producer for the Portland Mutual Life agency, a life member of the Oregon Leaders Round Table and active in the Portland Life Underwriters Association.

Reid's association with Oregon State has been very close since his graduation in 1934. For a number of years he was active in the Portland Alumni Club serving on numerous committees and as president for one year. In 1938 he accepted the alumni managership on the campus and held this position until 1942 when he entered the navy. In 1949 he was elected to the board of directors of the association and in this capacity directed the association's membership drive for two years.

## LET'S BE A FRIEND

by Mrs. Irene Carl  
Friends of Library President

"The library is the very heart of a college campus. As we return to our Halls of Ivy it is the library that perhaps holds most of the memories dear to us.

"We recall the frantic study for exams, the exciting steady who walked us home, and the day dreaming there of worlds to conquer. It gives us a feeling of nostalgic warmth and friendliness and we find ourselves friends of the library.

"With such a universal feeling, the Friends organized to help and promote the interest of the library. This organization is not limited to a select few but is open to everyone.

"Each Spring there is a Library Day. A contest is held at this time and OSC students display their private book collections. The interest is keen. There are many classifications and prizes given and they

are awarded at the annual Friends dinner in the evening. It is a gathering you would enjoy and should plan on attending.

"Another worthwhile activity is the Memorial Book Plan—the placing of a book in our library in memory or in honor of some friend. It is a most lasting gift.

"Many of us have books that would be a great addition to the College where they would be used and cared for. Or perhaps you know of someone who would like to leave their books in a place where they would live again. What a worthwhile contribution to Oregon State.

"These are a few of the activities we are sponsoring. Perhaps as a Friend you have suggestions to make.

"I hope you will become interested in this group that has its roots in the past and is growing toward a friendly future."

## MAKE PLANS

The heat of July might not be conducive to thoughts of fall and the Homecoming celebration on the beautiful Oregon State campus but plans are well underway for a gala weekend for Beaver alums.

Something that has been by-passed during the last few years, the Varsity O parade, will be again revived during festivities of the weekend of November 14, 15, 16.

Here is the schedule of events.

Registration will take place on Friday and the judging of house signs will also be held that night. The noise parade will terminate at the Homecoming bonfire. Following that will be the midnight show.

Registration will again be held Saturday morning. At noon in the armory will be the annual barbecue followed by the OSC-University of Idaho game on Bell field. Afterwards the coffee and donut jamboree will follow in the armory. Individual houses will serve dinners that night. Finishing up Saturday's events will be the Homecoming dance.

Start making plans for Homecoming November 14, 15, 16!

## New Directors

The board of directors of the OSC Alumni Association met Saturday morning, June 7, and the main matter of business was to elect to the board seven new members.

New members to the board are: District one, Elenora Pihl Purdy, '46, replaces the official position vacated by Ralph Floberg, outgoing alumni association president. Floberg remains on the board for one year in an ex officio capacity. Also from district one will be Crawford Graham, '36, who replaces Warren Reid.

District seven: Margaret Felthouse Poulson, '37, replaces George Scott.

District eight: Kenneth Kirby, '46, replaces George Wernmark.

District ten: Harold Whiteside, '33, re-elected. A. H. "Pete" Smith, '40, replaces Fred Ramsey.

Don Van Allsburg, '53, student body president, replaces John Thomas, '52.

It was also recommended and passed that Otto Hermann, '22, be elected to the board for a one year term to replace Robert Hirstel, '41, who has resigned under pressure of business.

The board elected the following officers for the 1952-1953 year: President, Marc Corwin; vice president, J. Clinton Davis; treasurer, Hal Whiteside.

In other business the board heard President Strand, Dean of Administration E. B. Lemon, and Fred Shideler give reports on conditions around the campus.

The proposed budget for the year was submitted by Treasurer Hal Whiteside and was passed by the board.

Carle Abrams, '00, and John Gallagher, '00, were elected to the board of directors to represent the Golden Jubilee Association.

## Retiring

A total of 459 years of service to Oregon State has been given by 14 members of the staff who will retire this year. Of the 14, three are voluntarily retiring, while the others come under compulsory retirement.

Miss Lucia Haley, assistant librarian, and Mrs. Elzie Herbert, order librarian, will relinquish their posts. Miss Haley came to OSC in 1921 and Mrs. Herbert in 1920.

W. L. Powers, head of the soils department, with 41 years of service, and C. V. Ruzek, professor of soil fertility, with 38 years of service, will retire.

The head of the food technology department, E. H. Wiegand, will wind up 33 years of service to State. Leaving the department of family life and home administration is Mrs. Sara W. Prentiss. She arrived at the College in 1917.

Two English staff members, Sigurd Peterson, head of the department, and Mrs. Beatrice Beebe, will leave. Peterson has given 41 years of service while Mrs. Beebe came to Oregon State in 1934.

Head of the speech department C. B. Mitchell came to OSC 32 years ago. Don C. Mote, with 29 years of service, will vacate his position. Mote was head of the entomology department.

Entomologist and superintendent of the

ABOVE, walking down "the last mile" to graduation ceremonies in the coliseum was this long line of seniors. The oldest and youngest graduate to receive degrees at OSC this year were Mrs. Agnes Stallard, 61-year-old grandmother who continued in college at the suggestion of her grandchildren and Rex Tussing, 18. Tussing received a bachelor's degree in liberal arts from the University of Chicago two years ago.

Hood River experiment station, Leroy Childs, is retiring after 38 years. With 36 years at OSC is Gordon G. Brown, horticulturist with the Hood River experiment station.

L. J. Allen, with 37 years of work in 4-H work and state 4-H club leader and Mrs. Azalea Sager, state home economics extension leader, will leave via the retirement route. She came to OSC in 1932.

Stepping into some of these vacant positions will be Dr. Herbert B. Nelson as head of the English department; Dr. Earl W. Wells, head of the speech department; Dr. Paul O. Ritcher, former research professor of entomology at North Carolina State college.

In 1929 Oregon State college had a student enrollment of close to 4000.

An all-time record number of doctor's degrees were conferred at the 83rd annual commencement exercises June 9.

Of the 35 doctor's degrees granted, 31 were doctor of philosophy degrees and four were doctor of education degrees. A total of 1197 students were candidates for degrees. Of this number 993 were candidates for bachelor degrees and 204 for advanced.

Both the graduation exercises and the baccalaureate services were held in the coliseum. Dr. Ralph C. Walker, pastor of the First Baptist church of Portland for the past 11 years, delivered the baccalaureate sermon.

Al. L. Grant of Baker spoke briefly as representative of the state board of higher education, and President A. L. Strand conferred degrees.

The school of engineering had the largest number of graduating seniors with 207. Business and technology ranked second with 173, followed by agriculture with 168, science 134, education 116, home economics 71, forestry 61, pharmacy 54 and nursing education 9.

Of the advanced degrees, 8 were masters of arts, 118 masters of science, 32 masters of education, 6 masters of forestry, 4 masters of home economics and 1 a mechanical engineer professional degree.

**GENERAL ARNOLD FUNK**

Arnold J. Funk was born in Stayton, Oregon, on August 13, 1895. In 1916 he was graduated from Oregon State College with the degree of Bachelor of Science. In 1917 he accepted a commission in the Regular Army as a second lieutenant of infantry.

And with the commission acceptance, Brigadier General Arnold J. Funk stepped into his career and the performance of brilliant service for the army.

As is usual in military circles Funk was moved hither and yon during those years before the second world war. A few of the places where he saw duty were Fort Leavenworth, Kan.; Camp Forest, Ga.; Camp Meade, Md.; Camp Lewis, Wash.; Schofield Barracks, Hawaii. Later he became assistant professor of military science and tactics at Boston University and at the University of Georgia.

It was in 1939 that Funk was assigned to the Philippine Islands at Fort William McKinley.

Those were busy years just before the Japanese bombed Pearl Harbor and invaded the Philippines. Funk was assigned to duty in the Army Far East Headquarters under General MacArthur. He was placed in charge of the location and construction of 10 Philippine Army Divisional cantonments.

Soon after the outbreak of war Funk was assigned to command the 57th U. S. Infantry combat team during the battle of Abucay and Abucay Hacienda. In 1942 he took over Chief of Staff of the II Philippine Corps. This corps was charged with the defense of the eastern half of Bataan, a sector that was the most vulnerable to attack by the Japanese.

With the Japanese exerting extreme pressure over the Philippines, all defense forces on Bataan were organized into the Luzon forces and Funk was designed Chief of Staff. At that time the Luzon force consisted of 85,000 Filipino and American soldiers. This poorly-equipped group was then

reduced to 65,000 before the Japanese finally overwhelmed them in April of 1942.

Funk was then held as a prisoner of war by the Japanese in several camps in the Philippines, Formosa, Japan, and Manchuria for three years and four months and was liberated in Mukden, Manchuria, in August of 1945.

Since 1946 General Funk has commanded Fort Sam Houston, was assigned to the European theater and commanded Stuttgart Military Post from March 1948 to November 1950. Upon returning to the U. S. he commanded Camp Edwards at Falmouth, Mass., until retiring in May.

Brigadier General Funk's decorations are the Distinguished Service Medal for service in the Philippine Islands. He was also awarded the Oak Leaf Cluster; the Purple Heart and Bronze Star Medal with "V" for service to the Philippine Islands; the Silver Star medal for service on Bataan in April of 1942.

## "AN ENLISTED MAN'S GENERAL" RETIRES

*THE photo at right shows General Funk just before his liberation at Mukden. It was snapped with a Japanese camera after guards had fled before imminent attack of American troops. Though General Funk's normal weight is close to 190 pounds, his years of imprisonment reduced him to 130 when this picture was taken. At left is American General Officers with their Japanese captors after the fall of the Philippines in early 1942. General Funk is shown third from left, rear row, while General Jonathan M. Wainwright is seated third from left.*

## RECITES POEM

### The Old Grad Comes Back

*by Ralph Shepard, '02*

I looked from my window  
and saw an old grad  
His face first was merry  
and then it was sad.

As his eye caught each object  
familiar or strange.  
As he picked out old landmarks  
or noted each change.

The years that he passed  
in the Old College halls  
Pass by in review  
as events he recalls,

And cinema-like  
pass faces that he  
Feels are present right now  
in this strange reverie.

He strolls up and down  
old scenes to recall,  
There's the same old "Ad" building  
and Apperson Hall,

And Old Kidder Hall  
that was then called "The Shack,"  
How fondly old memories  
come trooping back.

He watches the students  
all busy and gay  
And it comes as a shock  
that he's long been away.

In the old College days  
he somehow had a whim  
That the whole institution  
just centered on him.

But now he's a trespasser  
under the sun  
And some way he feels  
there's an injustice done.

He remembers the day  
when he first "made the team."  
And he quickens his step  
and again it would seem

## Stater Begins Manufacturing

Thomas A. McDougall, '40, is one of the principals in an important new manufacturing firm located in Los Angeles, Calif. Until establishment of the International Veneer and Plywood Corp. of which McDougall is sales manager and secretary, users of veneer in the Los Angeles area had to rely entirely on "outside" sources.

The new firm, which began operation shortly after the first of the year, will manufacture more than 1,000,000 square feet of African and Philippine mahogany plywood plus 1,000,000 square feet of veneer a month.

### Mahogany from Overseas

Logs are imported directly from Africa and the Philippine islands. These high-grade mahogany logs, together with fir logs from the Northwest, are sliced into veneer for the manufacture of plywood, furniture panels and doors. International Veneer and Plywood is the only concern in the entire Southwest United States which produces

veneer. Up to this date, veneer has been produced only in the Pacific Northwest and in states east of the Mississippi.

Although Los Angeles is the largest user of plywood of any city in the world, and ranks second in the manufacture of furniture, it has always been dependent on other parts of the country for veneer. McDougall's firm fills the long, recognized need for this industry in the Southwest.

The new plant is located on a two-acre site at 5510 West 102nd St., in the new Hayden-Lee Airport Industrial Tract near the International Airport and represents an investment of more than \$500,000. It employs 75 personnel locally and will distribute its wood products through jobbers in the United States and overseas as well as California. The company expects to maintain three shifts, seven days a week, by early spring.

### Products Are Top Quality

Plant equipment and facilities include warehouse space, three underground steam vats for "cooking" logs, a veneer slicer, dryer and a specially constructed hot hydraulic plywood press, an important factor in producing top quality plywood. Products from the new firm will meet rigid marine and aircraft requirements.

Charles E. Strait is president of the firm. Strait is credited with having established the largest plywood plant in the Philippines. Strait and McDougall formerly owned Strait and Co., importers and distributors of hardwood, plywood and doors.

McDougall, whose home was in Portland, was an engineering student at Oregon State and received the B.S. degree in 1940. From Oregon State he moved to Los Angeles and worked for Lockheed Aircraft Co. until he entered the navy in 1944. After he left the navy, he served as television distributor for Packard-Bell. McDougall then joined forces with Strait to form the importing company, Strait and Co. McDougall is a member of Phi Delta Theta fraternity.

He hears the applause  
of the crowd as it pealed,  
He's a hero once more  
on the track or the field.

He pauses awhile  
by the old trysting tree  
And I'm sure that this spot  
brings its own memory.

He glances around  
and sits down on a stone  
For his thoughts now I'd gladly  
give half that I own.

Oh, where are the maidens  
he used to meet there?  
Oh, many are grandmas  
with silvery hair.

Of the many he met there  
with quip or with jest,  
A few are now famous  
and some are at rest.

But the years bring their changes  
and time like a thief  
Steals many a loved one  
beyond one's belief.

And friends that he thought  
that forever he'd claim  
Have drifted so far now  
They're only a name.

But fighting life's battles  
for all he is worth  
Have tempered his passions  
and thickened his girth.

So he waves a goodbye  
to the scenes of school life  
And gladly goes back  
to his job and his wife.

In 1872 the Board of Trustees ordered that the male and female students in the College be not allowed to attend the same debating society.

# From Waste to Wealth

by Fred Zwahlen  
Instructor in Journalism

A new multi-million dollar industry may be a near-future realization for the Northwest because of basic research carried out at the Oregon Forest Products Laboratory located on the OSC campus.

Raw material for this potential industry would be Douglas fir bark which now litters Oregon's forests. Little bark is utilized compared to the 2½ million tons that are annually wasted from cutting 10 to 11 billion board feet of Douglas fir in Oregon and Washington.

## Three Products Possible

After making a chemical inventory of bark, Dr. E. F. Kurth, chemical section chief at the laboratory, concluded that three important products could be commercially obtained and marketed.

Major products are tannin, wax, and dihydroquercetin.

Tannin is mainly used for leather tanning and for controlling the fluidity of oil-well drilling muds. Douglas-fir tannin, Dr. Kurth reported, compares favorably with quebracho tannin for all of the major industrial purposes.

Waxes extracted from Douglas fir, Dr. Kurth said, can be modified for a variety of household and industrial uses. The wax is harder than bees wax but not as hard as carnauba wax.

## Wax Is Good

Douglas-fir wax gives a clear, high gloss to wood surfaces. The hardened wax, tests have shown, is easily applied and requires very little rubbing to give a highly lustrous polish. For the past two years, Dr. Kurth has even polished his car and furniture with Douglas-fir derived wax.

At present there is practically no natural wax extraction in this country. This new development at the laboratory has opened up an entirely new field as all of this country's carnauba wax and about 70 per cent of its beeswax requirements are imported.

The third chemical of commercial importance occurring in Douglas-fir bark is dihydroquercetin, a white, crystalline organic compound, which can be put to use fighting disease and preserving food.

Dihydroquercetin belongs to an organic group which possesses pharmacological properties characteristic of so-called vitamin P. These vitamins, it is known, are beneficial in the treatment of frostbite and fragility of blood capillaries. It can be easily converted to quercetin for additional established medicinal uses.

DR. E. F. KURTH, head of the chemistry section at the Oregon Forest Products laboratory, is shown holding wood polished by wax from Douglas-fir bark. Other materials on table are products and chemicals also extracted from the bark.

As an anti-oxidant, dihydroquercetin is capable of preventing rancidity in fats and oils such as butter and lard.

Dr. Kurth's studies have shown that a ton of bark will potentially yield 200 pounds tannin, 150 pounds wax, and 100 pounds dihydroquercetin.

Converted to dollars, it represents \$40 tannin, \$100 wax, and \$1500 dihydroquercetin at current prices. Chemical value for each ton of bark, about \$1640. According to Dr. Kurth, processes for extracting these three major chemicals are simple and conventional.

Dr. Kurth first began investigating Douglas-fir bark in 1947. A number of graduate chemistry students also performed their research on the project. Dr. Kurth doubles as a OFPL researcher and an OSC professor of wood chemistry.

Bark research at the laboratory has spread to several other major western softwoods, including ponderosa pine, sugar pine, lodge pole pine, Jeffrey pine, Port Orford cedar, incense cedar, western red cedar, white fir and grand fir. Some of these barks yield entirely different products when chemically analyzed.

The Oregon Forest Products Laboratory is a tax-supported research agency operated by the state, with the state board of forestry and the OSC school of forestry co-operating.

Its establishment was authorized by the legislature in 1941 and its operations began in 1947. Its most important function is to carry on research in the fields of utilization, fabrication, and manufacture of forest products, furthering the interest of forestry and forest products industries within Oregon.

## Governor Is Chairman

Guiding the actions of the laboratory is an eight-man advisory committee. Six members representing special interests are

# OREGON STATE COLLEGE

By FRED SHIDELER

President Strand, at the 1952 commencement exercises, put a little more than usual emphasis on two things in his brief message to members of the class of 1952.

One was the increased enrollment in graduate schools throughout the country, including Oregon State college. The other was Oregon State's widening horizons in connection with the institution's relationships with foreign countries and foreign students.

The rise of graduate schools is an encouraging sign, President Strand said. The 1190 degrees conferred by OSC in June were far from the record total of nearly 2000 two years ago, but a new all-time record was set for the number of doctor's degrees awarded.

## New Mark in Ph.D.'s

Thirty doctors of philosophy and four doctors of education degrees were conferred to establish a new mark at OSC for these top attainments. The largest number of majors for these Ph.D.'s were in various fields in the school of science, but other majors were rather widely scattered in such fields as food technology, agriculture and engineering. Home economics will be added one of these years. One doesn't have to be very old, nor even have an exceptional memory, to recall Oregon State's first doctor's degree.

Of the 212 advanced degrees conferred, 177 were masters and one a professional mechanical engineer's degree.

The cosmopolitan nature of the class of 1952 is indicated by the figures that show 34 degrees were conferred on students from 14 different foreign countries. They were part of the nearly 100 students from 32 other lands who were on the campus this past year. They do not include the 11 graduates from Alaska and Hawaii, of course, who were among the 73 Alaskans and Hawaiians registered in 1951-52.

## Increased Interest in World Affairs

Foreign students are becoming more and more a vital part of campus life, as President Strand indicated. They bring an international flavor and a quickening interest in world affairs to the campus that cannot be obtained in any other way.

They help us all in a better understanding of the problems of other peoples. We hope they take back to their own countries a constructive viewpoint of America, though we would just as soon they would forget some of the antics of certain minority groups, both on and off our campus.

Oregon State faculty members are spreading their know-how as specialists in different fields on every one of the six continents of the globe. They are in Europe, Africa,

Asia, Australia and South America—or will be in all of these areas soon.

Most recent to accept invitations to assist foreign nations in some of their technical problems are Paul M. Dunn, dean of forestry, and F. E. Price, dean of agriculture. Dean Dunn will spend a year under the auspices of the United Nations FAO program in assisting with establishing a school of forestry in Chile and on other forestry problems. Dean Price will go to Sao Paulo, Brazil, for two or three months this fall as a consultant in that progressive government's irrigation program.

## OSC to Exchange

Final details have not been worked out yet, but it is probable that Oregon State college will cooperate with Kaesetsart university in Bangkok, in an educational program. E. L. Potter, professor emeritus of agricultural economics, has been designated by President Strand to investigate the proposal made by the Mutual Security Agency of the state department. He will spend some time in Bangkok before reporting back on the possibilities.

The complete list of Oregon State staff members who are now in or have seen "foreign service" would add up to a couple of dozen or more names. They not only have done a service to the countries they have visited but they have contributed much to

Author of this column, Fred Shideler, has been appointed to the new post of director of information. This move by the administration is a reorganization of all College agencies of public information. Shideler has been head of the journalism department for 20 years and director of the College news bureau since the death of John C. Burtner in 1950. He will still continue as head of journalism.

Samuel H. Bailey will become head of the news bureau and assistant professor of journalism. He has been experiment station editor and on the teaching staff for the past five years.

the United States as a whole. If travel is broadening, they likewise have brought back much to the college and to their students and associates. This type of horizon-broadening is likely to increase. It is getting encouragement from the college administration.

It's not unusual, these days, to bump into an Oregon Stater anywhere—regardless of where it is.

## AFTER 25 YEARS

*IT DIDN'T* take long for the 1927 class to dig up the class will June 7. John Spurlock, Mrs. Velma Shattuck Mullen, and Freeman Fike look over the old will and class prophecy found exactly one yard in front of the right leg of the stone bench on lower campus. The contents of the class will were read at the luncheon at the Corvallis Country Club.

# ONE YEAR FOR DECISION ON EDUCATIONAL TV

*by President A. L. Strand*

A few months ago educators were watching the Federal Communications Commission to see what that powerful governmental agency was going to do about the allocation of TV channels for strictly educational purposes. Many of these observers were pessimistic about the commission taking any really significant action. But since the "freeze" suddenly thawed out last April 14 and the commission set aside 242 non-commercial channels, the situation is exactly reversed. Now the FCC is watching education to see what the erstwhile proponents of educational TV will do with the greatest teaching mechanism ever thrust into their hands. If education does not grasp the opportunity which has been offered by the commission, it could very conceivably turn out to be the most tragic loss ever suffered by the educational forces of the country.

We have less than a year to make up our minds. If the allocations for education are not taken up by June 1, 1953, a great many of them will be lost forever. Particularly is this true in metropolitan centers where competition for TV channels is strong.

## The Oregon Problem

Suppose we state the proposition for Oregon. Three of the very best channels of "Very High Frequency" have been reserved for education, namely, Channel Seven in Corvallis, Channel Nine in Eugene, and Channel Ten in Portland. In addition, an "Ultra High Frequency" channel, 18, has been set aside for Salem. This last is looked upon as not being quite as desirable as the VHF allocations on account of requiring a special adjustment on TV receivers. Within the next few months institutions, school districts, the State Department of Education, the State Board of Higher Education, or other possible educational agencies must apply for these channels and show evidence that they can and will be used for non-commercial educational purposes.

The allocations referred to above were supported by institutions and other educational bodies. For instance Channel Seven in Corvallis was supported by a statement

from Oregon State College. Actually, however, the reservations have been made for all the educational interests in any locality and the successful applicant must show that he can serve those interests and has their backing.

What will it cost? That is the real catch in the proposition and it seems unlikely that all the channels set aside for possible educational use in Oregon will be taken up. And this is precisely why some very careful and worthwhile planning must be done in order that the very best future use of such allocations as it may be possible to hold may be realized. The cost of a TV transmitter will vary according to the advantages or disadvantages of its location, its power requirement, etc. We have some tentative figures for one site and this is used here purely as an example. I refer to the use of Mary's Peak which is the highest point in the coast range and from where most of the population in the Willamette Valley and part of the coastal area could be reached. Portland would be partly shut off from this site by the "Newberg ridge." To locate a transmitter on this peak may run as high as \$450,000. That cost would include studios at Eugene and Corvallis and micro-wave transmitters from those two localities to the peak, together with the necessary cameras and other accessories. On top of that capital expenditure would be the annual cost of operation which has been estimated to be about \$150,000, depending on how much time the station was on the air, the availability of supplementary programs, etc.

## Cost Is Obstacle

The original capital requirement, while high, is probably not as great an obstacle as the annual maintenance and operation. Equipment can be expected to become obsolete rather rapidly as new technical advances in television are made such as the change to color which is well on its way now.

Beside the example cited, there are many other possibilities but, whatever the site, an expenditure of around a half-million dollars can be expected before a station can

get on the air. An alternate plan might be to center first on Channel 10 in Portland, where the greatest population can be served within the least area. Later, it might be hoped but not assured, that another transmitter, say on Mary's Peak, could be constructed to serve the rest of the Valley. At such a time, too, the extension of TV to eastern Oregon by micro-wave relays would be well within the bounds of possibility. If the state pays all or most of the cost, as much of the state as possible should be included in the benefits. Oregon has a difficult situation in this regard on account of its mountainous topography and the distribution of population into widely separated localities.

One question that arises is why cannot education depend on time which doubtless could be made available by commercial studios? Why go into such an expensive operation for educational television requiring studios, cameras, transmitters, etc., when adequate service could be obtained free or at reasonable cost from commercial stations? I think the answer to that is that commercial stations will sell their best time to the advertisers who will pay the most money. They would have to follow that policy to continue in operation. The time for strictly educational programs would vary according to the demand for various hours. Eventually, education, which might fare rather well at first, would find itself with the least desirable time, if it had any time at all. This will likely be denied by the opponents of educational television, but to those who have had experience in areas where commercial TV has been operating for several years, there is little doubt as to how things would turn out. Certainly in the minds of the Federal Communications Commission there is no doubt as to the great desirability of a large number of stations devoted solely to non-commercial educational programs.

The real question for governing boards of institutions, school authorities, and the legislature is: Can Oregon afford NOT to take advantage of the opportunity which has been presented by the FCC? Can we afford to pass up the chance to acquire extremely

valuable channels and foreclose ourselves from the widest future use of the greatest educational medium that has come along since the invention of printing?

### Strand Attended Meeting

About two months ago I represented the State System of Higher Education at a television conference financed by the American Council on Education and held at Pennsylvania State College. The National Broadcasting Company had brought in complete equipment for televising programs and for their reception so that we could see the complete operation. Lectures, seminars, demonstrations, etc., were staged and telecasted for us. In addition many kinescopes, which are film recordings of live television programs, were shown us. To those of us who came from areas where television is little known, the possibilities of this medium of teaching were a revelation. For scientific and technical institutions like Oregon State College, charged with state-wide educational responsibilities, it seems almost unthinkable that television would not be used. If passed up now, when channels are available, the time would surely come when possibly a more expensive decision would become imperative.

Recently Millard C. Faught, who is president of the Faught Company, Inc., management consultants in New York, has asked businessmen to look beyond the realm of business to the social and cultural environment in America today, particularly in regard to television as a powerful force in that environment. In looking forward to the time, which may not be far off, when we have "pay as you see and hear television," he has this to say in connection with higher education:

"Universities are precious storehouses. They have existed as luxuries of society that only those who could come to make personal withdrawals could fully enjoy. Not that they should discontinue as producers of scholarship, nurturers of the intellectually gifted; TV offers no substitute here. But in general they have always been an expensive and inefficient method of 'merchandising' learning and knowledge—especially in the broad sense of adult education and for average men and women, so important in a democracy.

### "Tools Now Exist . . ."

"If television can finally provide the way to part those ivied curtains and open our storehouses of learning to the people, it will fulfill a dream that educators have had since the days of radio's first crystal sets. And if, besides, television can be provided with a method to collect its own tuition, the millenium will have come—and none too soon, for higher education is having a hard time making ends meet now that costs have risen and the flow of gifts has been slowed . . . by higher taxes.

"Such objectives, long nurtured on hope alone, are no longer academic. The technical tools now exist . . ."

Mr. Faught is not the only businessman who is thinking and planning ahead. Some important business leaders in St. Louis, for instance, are ready to sponsor programs for an educational network, programs of outstanding excellence which no one station or organization could possibly afford to pro-

(Continued on page 21)

## Student Views on Campus News

By Lucile Davis, '54

Biggest news on the OSC campus at the end of spring term is the Beaver baseball team. The excitement felt by Staters at being Pacific Coast champs and also contenders in the national finals at Omaha shows through even in the midst of final week confusion and commencement festivities.

\* \* \*

"College Is Worse Than Ever," Oregon State's traveling talent show, has made a good start at promoting public relations for OSC this year. The performers in the variety show have traveled to Portland university, Willamette university, the University of Oregon, and Portland's Shriners hospital. In addition, they have performed in the OSC coliseum for the visiting high school seniors during Senior weekend and at the Corvallis Country club for an OSC Boosters club meeting. The show, originated this year, will continue in its promotion of OSC next year.

\* \* \*

### Seniors Honored at Commencement

To officially wind up their four-year stay at Oregon State, the seniors held a class barbecue at Avery park after graduation practice. Eighty-three members of the class of '52 were recognized with senior honors at this year's 83rd annual commencement. Degrees were conferred on 1197 students.

\* \* \*

Fourteen staff members will retire from the OSC administration this year. Their combined service to the school totals 459 years, an average of 32 years each. Of the 14, three are retiring voluntarily, and the other 11 come under compulsory retirement.

\* \* \*

### Homecoming Scheduled

Next year's Homecoming committee is sponsoring a week-long contest this spring, hoping to get an appropriate slogan to set the theme for Homecoming, 1952. Homecoming weekend is scheduled for November 15, when we will play the University of Idaho Vandals.

\* \* \*

Formal dedication of Withycombe hall, the newest building on campus, was held recently. The building, which houses the departments of animal husbandry and dairy husbandry, has been named after the Oregon State pioneer of these departments, Dr. James Withycombe. Dr. Withycombe came to OSC in 1898. Since that time he was elected governor of Oregon for two consecutive terms. He died in 1919, soon after taking office for the second term. A bronze plaque with a picture of Dr. Withycombe on it will have a place in the foyer of the new building.

### Panty Raids Cause Stir

One of the most amusing things we've seen on the OSC campus in a long time: The day after the panty raids every nook and cranny of the campus had a little secret-looking group buzzing with whispers. Some were fellows rehashing the midnight activities, others were girls telling of their nocturnal experiences, and, of course, many were wide-eyed bystanders trying to find out what *really* did happen. All in all, it caused a large stir. Chief criticism of the panty party in the eyes of the students seemed to be the lack of originality of the demonstration.

\* \* \*

New Barometer editor is Tom Poulsen, '53, science major from Corvallis. Tom has been working on the Baro since he was a freshman; he served as managing editor and member of the editorial board this year.

\* \* \*

### Sophomores Celebrate

Sophomores celebrated a traditional class weekend this term with a Sadie Hawkins day theme. Activities, including skits from each living group, a beard contest, various types of races, swimming, and baseball games were held at Colorado lake. Class spirit came to the fore as all violators of beard contest rules were tossed into the lake, Dogpatch costumes and all.

\* \* \*

Approximately 750 mothers of Oregon Staters visited the campus for Mothers weekend events. Moms attended the Mothers club meeting, a luncheon, a tea, and a student talent show. At the business meeting, full tuition scholarships were awarded 15 students. The awards, given on the basis of need, scholarship, and campus service, were given to eight men and seven women.

\* \* \*

### Staters Dance to Noble

Sally Shideler, education major from Corvallis, was named senior honor girl at the twenty-ninth annual women's honor assembly held early this term. One of Sally's outstanding jobs this year has been presiding over Associated Women Students' affairs.

This year at the first Junior-Senior prom at OSC, Staters danced to Leighton Noble's music in the Coliseum, decked out in a "Halls of Ivy" theme.

\* \* \*

Top honors in the twelfth annual Interfraternity Sing contest went to Sigma Nu. Their singing of "Cindy" and "Ridin' Down the Canyon" won the cup. Second place award was presented to Beta Theta Pi, and third place to Sigma Phi Epsilon.

## BEAVER

## Sports Roundup

by John Eggers

Athletic News Director

Hats off to those Beaver baseballers of 1952—a team that played best when the chips were down and the pressure was on. Coach Ralph Coleman's outfit, probably the most colorful ever assembled at OSC, swept not only the northern division title, but the Pacific Coast conference and Western Regional NCAA crowns, as well. And as we go to press, the Beavers are carrying the far western banner into the NCAA finals at Omaha.

Regardless of the results at Omaha, the Orange sluggers had a grand year—grand not only because of a 27-10 won and lost mark, but grand in the sense that Oregon State has finally become a baseball power of national significance. It took a long time, but alums everywhere must be happy to know that Beaver baseball is on the upswing.

## Idaho Helps Beavers

Let's review the season, and point out precisely why the 1952 Beavers won their laurels the hard way. Actually, they found it much rougher sailing in their own northern division race. The circuit was probably the best-balanced in years and the championship wasn't decided until the final day of the season—when Idaho upset Washington at Moscow. Over the 16-game span, Oregon State swept all four from the Vandals, took three out of four from Washington and split with both Washington State and Oregon. That was good enough, to be sure, but even the most loyal followers appeared doubtful about OSC's chances against USC in the PCC playoffs.

The Trojans, perennial coast champions, found anything but a cordial welcome in Corvallis. Oregon State whipped them twice in a row, by scores of 12-10 and 5-4. Capt. Pete Goodbrod's single in the ninth inning of the second game brought Oregon State its first coast conference crown in history.

## Orange Club Fresno

The playoff with Fresno State, independent champion of the west, for the district eight berth at Omaha, was even more exciting. Lefthander Don White hooked up with Bulldog Ace Larry Bolger in the opener, with the Beavers winning, 2-1. In the title clincher, Orange bats clubbed four Fresno State chuckers for a convincing 8-4 decision. Norb Wellman, only a sophomore, did the mound honors for OSC, with Jay Dean, freshman first-baseman, leading the attack with a perfect five for five at bat.

That was the way the water flowed all season long. When you didn't expect them to win, they would come through like the champions they potentially were all along. L. H. Gregory, well-known sporting editor of *The Oregonian* in Portland, hadn't covered a college baseball game in years, but he made a point of being on hand for the

Johnny Eggers has now taken over the head duties in the athletic news office since Irwin Harris' appointment to full time manager of educational activities. Eggers will now write the Beaver Sports Roundup.

playoffs with USC and Fresno State. The veteran scribe was highly impressed—both with Orange pitching effectiveness and hitting power.

## Helbig, Brem Get Honors

Dwane Helbig, the big outfielder from Portland who also is a first-string end in football, drew most of the individual accolades. He was the only unanimous choice on the all-northern division team and also won a first-string spot on the all-western regional team. Pitcher Bailey Brem, sidelined through the playoff by an injury, nevertheless was selected by coaches on the all-west nine. And for those shunned on all-star selections, the thrill of reaching the national tourney was far greater in importance.

Just for a brief rundown on the batting order in the championship series, it went like this: Pete Goodbrod, cf; Chuck Fisk, ss; Danny Johnston, 2b; Jean Dean, 1b; Dwane Helbig, lf; Bud Shirliff, rf; John Thomas, c; and Cub Houck, 3b. And for

pitchers—just two—Don White and Norb Wellman.

Remember those names. Goodbrod, Thomas, Houck and White are the only seniors of the group, so you'll be hearing a lot more about the others in years to come. They're the best in the west, beyond any realm of doubt.

## Track Has Stars

While baseball was cornering most of the headlines at OSC, Hal Moe's trackmen weren't caught napping. Four Beaver cinder aces ended up with all-time OSC records. We're referring to Lyle Dickey, pole-vault; Ralph Sutton, javelin; Duane Eby, shotput; and Merv Brock, sprints.

If judged from a national picture, Sutton probably turned in the most spectacular performance. The former Bend high school star tossed the javelin 224 feet 2½ inches at Eugene to win the PCC title, edging out defending national champion Chuck Missfeldt of Oregon. At the PCC test, Dickey took second in his specialty, Eby finished fourth in the shot and Brock had a second in the 220 and third in the 100.

Lack of all-around strength—that depth that wins meets—cost the Beavers their chance of team triumphs. But it must have been a great satisfaction to new coach Hal Moe to watch individuals like Dickey, Sutton, Eby and Brock hold their own against the best in the conference. Sutton and Brock still have another year of competition remaining, too, and will be gunning for national crowns, come another cinder campaign.

## Golf Looks Up

SCRAMBLED SHORTS: In tennis, Oregon State finished third, behind Washington and Oregon. Eddie Dey and Pete Carter, two sophomores with a lot of promise, reached the semi-finals of the ND doubles tourney. Don Megale, number one man on the squad, pulled a big upset during a dual meet with Oregon. He upended Tom MacDonald, Duck ace . . . the Orange golfers did extremely well in non-conference matches, but ran into rough opposition in northern division play. Coach Jim Barratt used a lot of underclassmen, however, and feels another year will show marked improvement . . . oh for another Dick Yost at Oregon State.

Oregon State football suffered a severe blow when Linebacker Bob Redkey's petition to the conference for another season was rejected. According to Redkey, he played one season at Oregon Technical Institute, which was then a vocational school in no organized conference. He never registered or attended classes and played with the understanding it would not count against his future college eligibility. At any rate, his petition was turned down cold.

## SLUGGER

DWANE HELBIG, OSC's sophomore left fielder, was the only unanimous choice for the all-Northern Division team and was also picked on the all-star team for the NCAA district eight region.

## SPEAR ACE

**RALPH SUTTON**, the Beaver's javelin star, copped the PCC title by throwing the spear 224 feet, 2 1/2 inches to beat out Oregon's ace, Chuck Misfeldt, who was the PCC and national champ last year. Sutton is a junior and hails from Bend.

## 1952 FOOTBALL

Sept. 20—Utah at Salt Lake.  
Oct. 4—Michigan State at Portland.  
Oct. 11—Stanford at Palo Alto.  
Oct. 18—USC at Portland.  
Oct. 25—WSC at Pullman.  
Nov. 1—U. of W. at Portland.  
Nov. 8—UCLA at Los Angeles.  
Nov. 15—Idaho at Corvallis (Homecoming)  
Nov. 22—Oregon at Portland.

The Beaver baseball team fell before the bats of Duke to the tune of 18 to 7 and then next day lost to the University of Texas by a 10 to 1 score in the NCAA baseball tourney in Omaha, Neb., June 13 and 14. The "college world series" gathered the eight top teams for the playoffs.

## TOO TOUGH?

**Bob Redkey**

## Back to Campus After 53 Years

If Redkey hadn't gained the reputation as the best linebacker in the PCC, would the petition have been rejected? We wonder.

Dave Mann, ex-Oregon State left half-back who was suspended from school because of academic deficiencies, signed with the Oakland Oaks of the Pacific Coast baseball league . . . doubled in two runs in his first pinch-hit appearance at the plate . . . football squad members feel that Jim Cordial will make a great team captain next fall . . . if Doug Hogland isn't one of the best tackles on the coast his senior year, Line Coach Len Younce will be more than mildly surprised. He's that good, says Likeable Len.

William H. Beach, class of 1899, returned to the OSC campus for the first time in 53 years, June 7, to attend the reunion of the Golden Jubilee association. Mr. Beach came to OSC from the tenth grade in high school and received a degree in mechanical engineering.

Beach spent his first day walking around the campus trying to recognize some familiar sights. The only buildings that were here in his time, he said, were Benton Hall, then the administration building; the gymnasium building, now the armory; Mechanical hall; Cauthorn hall; and the girls' dorm, Alpha hall.

Impressed with the immensity of the College today, Beach said, "It is a thrill to come back and see the marvelous growth the College has made. The College has grown into a man now. When I was here it was just a child waddling around in a triangular cloth."

Beach was the first basketball coach at OSC. In those days it was a women's team as . . . "the boys wouldn't play basketball, they thought it was sissy stuff," Beach declared.

Beach said he coached the girls' team for two years and that they never lost a game while he was coaching. He brought a picture of that first team and turned it over to the alumni office. In it were pictured Beach, and Fred Smith, manager; Lilly Raney, Inez Fuller, Dora Hodgins, Fanny Getty, Bessie Smith, Leona Smith, and a girl named Holden.

Beach drove all the way out from Racine, Wisc., for the reunions and had quite a chat with one member of that first team . . . Fanny Getty Wickman, now a housewife in Portland. Beach's grandson, Lawrence Beach, graduated from Oregon State this June.

## Haberlach Makes Olympic Team

Herb Haberlach, '50, one of Oregon State's great wrestlers, is continuing his mat success by wrestling under the Portland Multnomah club colors. Haberlach won a place as alternate on the 1952 Olympic Games team in the finals of the national Olympic trials held at Ames, Iowa, last April.

Haberlach joined the Olympic team in June at Annapolis, Md., for training. He will go to Helsinki, Finland, as a member of the U. S. team July 19-24.

Haberlach, while wrestling for the Orange and Black, was Pacific Coast collegiate champ in the heavyweight division for two years in a row.

Still another Oregon Stater, Paul Buhler, '50, in the 174 pound class, was pinned in the semi-finals by the light-heavyweight champion.

It will be remembered by many Oregon Staters that in 1924 Robin Reed, probably the greatest Beaver wrestler, took the 135 pound Olympic championship in Paris.

# Alumni 'Round the World...

## '82-'99

William Y. Masters, '82, is practicing law in Portland. He was 90 years old in April. Mrs. A. C. McIntyre, '99, who was Oregon Mother for 1952, is a daughter of the late Thomas E. Cauthorn for whom Cauthorn hall was named.

## '02

Chester W. and Sibyl Cummings Laughlin, '03, have three sons and three daughters who attended Oregon State. The Laughlins, who are retired, are living in Astoria.

## '05

J. C. Henkle, who was general superintendent of Portland General Electric company, retired early in May. He is being retained as a part-time consultant. Mrs. Alice Wicklund Mills, who has been director of the Mount Holyoke college speech department in Massachusetts, retired at the end of the last academic year.

Associate Professor of Speech Alice W. Mills retired from the faculty of Mount Holyoke college in Massachusetts at the end of the current academic year.

A member of the Mount Holyoke faculty for the past 20 years, Prof. Mills has been instrumental in building up the speech department from one concerned primarily with voice training and diction to a department that now offers courses dealing with radio production, introduction to broadcasting and scientific principles of speech correction. The department has developed from a twelve-hour limitation of college credit in speech to participation in two major fields of study, drama-speech and psychology-speech.

Mrs. Mills was born in Monroe, Utah, and was graduated from Oregon State College with a B.S. degree. She received a diploma in oratory from Northwestern University and her M.A. in speech from Iowa State University. She has also studied in the field of speech correction and English phonetics at the University College of London.

Before joining the Mount Holyoke faculty in 1932 as associate professor of English speech, Mrs. Mills was assistant professor at the state universities of Montana and Iowa and associate professor at the University of Southern California.

She has taught summer sessions at Hunter college, the University of California, University of Colorado and Denver University. She has also given teachers' courses in Amherst, Springfield and Hartford for Massachusetts and Connecticut University Extension Divisions of the State Boards of Education.

Widely known outside the college for her work toward the rehabilitation of handicapped people, Mrs. Mills has been on the staff of the Bay State Society for the Crippled and Handicapped since the establishment of their western division, the Treatment-Training Center in Springfield, Mass., first as director of speech therapy at the Center and then as consultant on speech therapy to the state society and as a member of the society's state advisory council. Mrs. Mills has also served as co-director of speech therapy at the Language Clinic of the Massachusetts General Hospital, Boston, Mass.

In 1940, as a member of a sub-committee for the New York City board of education, during a survey of the services for physically handicapped children, she assisted in making an evaluation of the New York City program of speech improvement. She is now special consultant in speech correction to the public schools of the city of Holyoke, Mass.

After her retirement in June, Mrs. Mills planned to spend a few months traveling before

resuming her work in the fields of speech therapy. Mrs. Mills has two sons, Robert Park Mills, Long Island, N. Y., and Norman Macleod, Santa Fe, New Mexico.

## '09

S. B. Hall, Troutdale, is vice chairman of the state board of agriculture.

## '08

J. E. Hanny retired in March as the first vice president of Crown Zellerbach corporation. Mr. and Mrs. Hanny and their daughter are now living in Portland.

# OREGON STATER PHOTOGRAPHER LEAVES

Dick Gilkey, '51, man about campus with his camera for the last five years, will pack his flash bulbs and equipment the end of this summer and head for Fortuna, Calif., where he will teach chemistry and physics at the Fortuna Union high school.

Few photographers have been as versatile on the OSC campus as has Gilkey. He has been taking Oregon Stater cover pictures ever since he entered OSC from his home town of Portland. This past year's series of OSC coeds that have graced Stater covers will lead into next year series of some of the outstanding College faculty members at which Gilkey is now at work.

Gilkey's activities ranged from winning the freshman award for contributing most to the Barometer to being associate editor of the Beaver yearbook this year. Between these distinctions are a host of other activities such as member of the Memorial Union activity council, photo editor of last year's Beaver, president of the M.U. Camera Club. During his sophomore year Gilkey helped put out a commercial campus magazine, Paste Up at State.

Gilkey will finish work this summer on his masters degree in education.

## '21

Clyde Hubbard is director of athletics at the University of Montana at Missoula.

Mr. and Mrs. Bart Melgreen have purchased the Roma Vista motel in Dundee. LaVelle Wood wrote from Ohio State university, Columbus. George N. Wait is sales promotion manager for Blake, Moffett and Towne, in Portland. Charles R. Paine is a real estate broker in Portland.

Maj. Charles A. Oits graduated from the army's general staff course at the Command and General Staff college, Fort Leavenworth, Kans. George

## SPEAKS

Speaking at the dedication ceremonies of Withycombe Hall in May was Dr. Richard J. Werner, '17, assistant executive director of the Milk Industry Foundation, Washington, D. C.

Werner's career since leaving College has been varied and brilliant. He received an MS at the University of California in 1923 where he majored in agricultural education. In 1926 he was appointed state commissioner of secondary schools in California. In 1932 he was field manager of the Golden State company. From 1937 to 1942 he was president of Salinas Junior College which is now called Hartnell College.

Werner's military career started in World War I when he was a private and during World War II he advanced to colonel. His decorations include the U. S. Legion of Merit, Bronze Star and Purple Heart, the Dutch Order of Orange, Italian Order of the Crown, French Croix de Guerre, and the Belgian Croix de Guerre with Palm.

In November, 1950, Werner was appointed to his present post as assistant executive director with the Milk Industry Foundation.

A. Robinson, ex '44, and his father-in-law have a new lighting fixture company in Portland. Bonny Laughlin Rautman is living in Seattle, Wash. She has a son and a daughter.

### '45

Mr. and Mrs. Eugene J. Guldemann (Joy Clement) are living in their new house which they built themselves, in El Paso, Texas. Lorlei Metke (Mrs. Harry Metke) is living at 4798 Hagan Road in Washington, D. C.

### Married

Thurm-Zobrist—Rhoda M. Thurm was married last year to William F. Zobrist, Jr., at the St. Michaels All Angels Episcopal church in Portland. They are now living in Spokane, where Mr. Zobrist is a mechanical engineer.

### Born

DeYoung—Howard Byron was born in March to Mr. and Mrs. Byron DeYoung, Jr., of Troutdale. Byron is employed in Portland by the Farmer's Cooperative association as a field representative. They have an older child, Scott.

## Year for Decision

(Continued from page 13)

duce. At first, no doubt, such programs would be distributed through a film service to educational stations, but if education takes full advantage of what is open to it now, one does not have to be fanciful in predicting a time when a complete network of educational stations will exist. They will produce most of their own programs, but a central core of excellent productions, available at certain hours on a national basis would be a tremendous advantage.

The importance of the decision to be made by educational organizations and legislatures during the next few months cannot be over-emphasized. It is betting on the future, which is an old American custom. These United States of America, about which we are extremely concerned at the present time, will be affected more by the use we make of television than by any other of the great inventions which have been absorbed into our manner of living. Since colonial times woven into the fabric of our national life is that "golden thread of a radiant dream" of what some time America might become. That golden thread has been our faith in education. How we use television will determine, it is safe to say, how bright we keep that golden fiber, or how tarnished we allow it to become.

### '46

Barbara Jane Dargatz (Barbara Adams) is living in Peoria, Ill. and combining the occupations of homemaker and secretary for a law firm. James E. Hayden is a construction engineer for Standard Oil company at El Paso, Texas. Mrs. Kenneth S. Roberts (Priscilla Wilson) is now living in Portland after moving from North Bend.

Maxine Smith received her masters degree in physical education at Washington State college. Helen Stevens Schrier has been in Honolulu where her husband is stationed with the navy. Don Lewis is manager at Southern Oregon College of Education.

James and Mary Jo Clapp are living in Fort Wayne, Ind. They have a new home, in which

## Waste to Wealth

(Continued from page 10)

appointed by the Governor upon recommendation of each interest.

The governor of Oregon, an ex-officio member of the advisory committee, is its chairman, and the state forester is automatically the secretary. The dean of the OSC school of forestry, Paul M. Dunn, is laboratory director.

Present members of the advisory committee are Governor Douglas McKay; Robert W. Cowlin, Director of the Pacific Northwest Forest Experiment Station, U.S. D.A.; H. J. Cox, Willamette Valley Lumbermen's association; Carl A. Rasmussen, Western Pine association; Dwight L. Phipps, acting state forester; Charles W. Fox, Oregon Plywood interests; Frank A. Graham, West Coast Lumbermen's association; and Dean Dunn.

The laboratory has a staff of 34 full-time employees, including chemists, wood technicians, forest products technologists, engineers, skilled workers and administrative personnel.

Busyness is the theme at this research center. At present some 50 different projects in the fields of wood chemistry, wood technology, engineering, and industrial services are being studied.

Anyone may obtain advice, assistance, and information relative to forest products utilization problems from the laboratory. This past year more than 1100 persons visited the laboratory, 754 letters requesting information were answered, and 660 bulletins were mailed.

Research at the laboratory has helped and will continue to foster the complete utilization of Oregon's forest products.

they have done the painting, lawn, drive, and kitchen cabinets. J. Willard Whitesides is selling life insurance for Reliance Life of Pittsburgh, in Santa Ana, Calif.

J. Donald Kroeker, '27, consulting engineering firm, has expanded to include nine engineer assistants as associates. Six of the men are from Oregon State. They are Edward R. Hoerner, Elbert E. Kelly, John H. Bonebrake, William D. Maxwell, Robert W. Peterson and Robert E. Selberg, all '47.

Lois Ethel Linton is a stewardess for United Air Lines and lives in San Francisco, Calif. Mrs. Marcus L. Youngs, Jr., (Genevieve Thomsen) is now living in San Leandro, Calif. The youngs moved there from Portland.

Richard D. Swanson is enrolled at the American Institute for Foreign Trade, at Thunderbird Field,

This is just one of the many fields  
in which Union Carbide offers  
**CAREERS WITH OPPORTUNITY**

## Clearing the track of clickety-clack

You can ride in comfort on longer-lasting rails because the song of the track is being stilled

Like the paddleboat whistle on the river, the clickety-clack of wheels on rails is on its way to becoming a memory.

This familiar clatter and chatter has been like music to some of us when we travel. But it's been a headache to others . . . particularly our railroads.

Wheels pounding on rail joints cause jolting and wear as well as noise. And wear means expensive repair or replacement of rails and the bars that connect them.

**ELIMINATING RAIL JOINTS**—"Ribbonrail" is becoming important news because it provides a way to solve the high cost of joint maintenance by eliminating the joints themselves.

**RAILS BY THE MILE**—"Ribbonrail" is formed by welding the rails together under pressure in the controlled heat of oxy-acetylene flames. The welding is done on the job before the rails are laid . . . and they become continuous ribbons of steel up to a mile or more in length.

Mile-long lengths of rail in use may seem impossible be-

cause of expansion and contraction under extreme changes in weather and temperature. "Ribbonrail" engineering has solved this problem . . . reduced rail maintenance cost, and created the comfort of a smoother, quieter ride.

**A UCC DEVELOPMENT**—"Ribbonrail" is a development of the people of Union Carbide. It is another in the long list of achievements they have made during 40 years of service to the railroads of America.

### STUDENTS and STUDENT ADVISERS

Learn more about the many fields in which Union Carbide offers career opportunities. Write for the free illustrated booklet "Products and Processes" which describes the various activities of UCC in the fields of ALLOYS, CARBONS, CHEMICALS, GASES, and PLASTICS. Ask for booklet B-2.

Phoenix, Ariz. His course of study concentrates techniques of international business administration, foreign languages, and characteristics of foreign countries.

Jon J. Neff is a second lieutenant in the Marines. He is married to the former Jeane Arlys Cortright. Bill Macomber is an officer candidate at Fort Riley, Kan. He will be commissioned in September. His wife is the former Beverly Bentz, '54.

Robert C. Crawford is now living in Salem where he is a pharmacist at Mootry's Drug store. D. D. MacPherson is now in Washington, D. C., where he is with the civilian defense administration.

### Married

Havelhurst-Dewey—Mardie Havelhurst, ex '51, eloped recently with screen actor Dewey Martin. Rohlfss-Smith—Donald G. Smith was married in February to Carroll Taylor Rohlfss. They are living in Seattle.

Hill-Walker—Marilyn Hill was married in June to Deke Walker at Salem. Marilyn formerly taught in Grants Pass. They will live in Portland.

Case-Beals—Janet Case and Donald Beals were married in Portland in December.

Fox-Weatherford—Earl Weatherford married Dolores Fox, '52, in The Dalles, Ore., last fall. Earl is associated with his father on a cattle ranch near Arlington.

Macdonald-Schwind—Leonard J. Schwind married Betty J. Macdonald in Oakland last year. Leonard is an engineer with United Air Lines in San Francisco.

### Born

Blair—Dean and Joan Ellen Aune Blair have a daughter, Diane Ellen, born in April. Lt. Blair is stationed in Japan with the air force.

Fisher—Ruth Ida Fisher was born to Donald H. and Louise J. Fisher in September. They are living in Portland.

### '52

Dan Hiller Jr. has been commissioned in the navy reserve following graduation from the navy's only officer candidate school at Newport, R. I. Richard G. Buckovic has been elected as Smith-Hughes agriculture instructor for next year by the Scio Union high school board, Scio, Ore.

Gracie DeMoss was named to the United States Curtis Cup golf team which will travel to Scotland to defend the cup against the British.

### Married

Meek-Paul—Married March 1 in the Sunnyside Methodist church in Portland were Mary Meek, '53, and Ralph Paul.

## FLASH

The annual Oregon State picnic at Jantzen Beach outside of Portland has been tentatively scheduled for August 22, it was learned at magazine press time. The event is student body sponsored and alumni, friends of OSC, prospective students, are urged to attend. The popular Ray Anthony band is expected to be playing there at that date.

Crawford Graham, '36, was elected president of the Portland alumni association and took over his duties June 7. Graham replaced J. Clinton Javis, '41, who is now vice president of the alumni association.

In August of 1872 B. I. Arnold was elected president of the college.

## COMPLETES COURSE

Joseph K. Fisher, III, Santa Monica, Calif, was recently commissioned with the rank of ensign, U. S. Coast Guard Reserve, after successful completion of an intensive four month course at the Coast Guard Academy at New London, Conn.

## HAPPY

There are happy smiles in and around the confines of OSC's basketball coliseum.

The reason? One of the most fabulous high school basketball players in Oregon and the nation, the seven foot Wade "Swede" Halbrook has indicated publicly through the newspapers last June that he plans on playing his college basketball under Slats Gill.

The tall hooper, object of attention from many, many, colleges, has just about rewritten the scoring books. Halbrook scored 71 points in one game last winter and then led his teammates to the Oregon high school basketball championship with a 53 point splurge during one game.

### Senior Weekend Popular

A total of 1251 high school seniors signed the registration books at OSC this Senior weekend. The ratio between boys and girls was almost half and half, with 631 boys and 620 girls. General consensus of opinion was that the weekend was "highly successful."

A capacity crowd of 200 attended the annual Theta Sigma Phi Matrix Table banquet this term. Campus Women of Achievement honored at the dinner were Janet Schade-witz, education major from Portland; Sally Shideler; and Velda Brust, education major from Corvallis. The speaker, Mrs. Martha F. McKeown, Hood River novelist and Portland Woman of Achievement in 1949, told of her experiences as an author.

# Faculty Feature

## Faculty News

Bernard Malamud, English department instructor, recently signed a contract with a New York publishing company for publication of his first novel, "The Natural." The story has a baseball setting.

Dr. Fred F. McKenzie, chairman of the OSC animal husbandry department, is now in Australia on a year's sabbatical leave. Dr. McKenzie, an internationally recognized authority on artificial insemination and animal breeding, will assist the first faculty of animal husbandry in Australia at the New England University college, New South Wales.

Ralph DeMoisy, former assistant professor of forest engineering, has been named as woods manager for the Eureka, Calif., plywood division of the M & M Wood Working company. L. J. Allen, 4-H club state leader who has been attached to the extension department for the past 37 years, resigned effective the first of September. Dr. James G. Knudsen, associate professor of chemical engineering, has been appointed to the University of Michigan staff.

Dr. William B. Back is now with the OSC staff. He is assistant professor of agricultural economics. His undergraduate work was obtained from Berea College, Ky. Dr. Paul R. Ellicker, acting head of the OSC bacteriology department, was recently named honorary Sigma Xi lecturer for 1951-1952. W. A. Schoenfeld, dean emeritus of the school of agriculture, has been reappointed a member of the 12th district farm credit board.

Dr. Edouard Bourbousson, associate professor of modern languages, has organized a summer tour through Europe. Dean of science F. A. Gilfillan is teaching the summer quarter at San Jose State college in California. Lester Kirkendall, associate professor of family life, has been elected vice president of the Pacific Northwest Council on Family Relations. Gordon Gilkey, head of the art department, was recently selected to serve on the jury of selection for the 24th International Exhibition of Prints held at the Seattle art museum.

J. David O'Dea, education counselor and instructor at OSC for two years, has accepted an appointment at the University of Wisconsin. Capt. Clyde M. Jensen, former commandant of navy cadets, was recently awarded the bronze star medal for exceptionally meritorious service and performance of duty off Korea where he was commanding officer of Destroyer Squadron One.

A Fulbright award from the U. S. state department has been granted to H. H. Palmbeck, associate professor of sociology. Professor Palmbeck will stay a year in New Zealand and do research in rural sociology. This is the third Fulbright scholarship to be given Oregon State staff members in the past two years.

John M. Swarthout, chairman of the OSC political science department, has recently been elected vice president of the Western Political Science Association. Dr. Helen Gilkey, professor of botany and curator of the herbarium emeritus, was recently presented with the Oregon Academy of Science citation for her outstanding work and contributions in the field of botany. Dr. Rosalind Wulzen was recently honored at the Delta Kappa Gamma, national honor society for women teachers, by being presented the state educators award for the woman writer who had contributed most in the field of education.

Mrs. Sara W. Prentiss, head of the department of family life, was elected president of the Benton county chapter of the annual meeting held last April. Sarah L. Lewis, former professor of domestic science from 1912 to 1920, recently died in Corvallis. She was born in Nebraska in October 1871. After she left Oregon State she was head of the home economics department at the University of Nevada.

## Prof. Charles B. Mitchell

Professor Charles Buren Mitchell, after thirty two years of devoted effort to the development of dramatics on the Oregon State campus, will retire in June.

Professor Mitchell was born in Lebanon, Indiana. It was in this town, at the age of five, that he was given his first instruction in speech. His mother felt that everyone should have the ability to speak with ease before a group; thus Mrs. Mitchell gave her son lessons in reading prose and poetry, and extemporaneous speaking.

Professor Mitchell's contact with the theater came when he was very young. In the gaslight days he played child parts, ushered, and was a call boy. In high school he was active in debate, oratory, and dramatics. From 1908 to 1910 he was connected with the Chatauqua group. He toured the United States with them, doing readings and acting. Professor Mitchell played Mt. Lake Park, Maryland; Richfield, Iowa; and Peoria, Illinois. He worked with two Shakespearean companies in a wide variety of parts, the most famous being his interpretation of "Touchstone" in *As You Like It*.

### Has Art Ability

Professor Mitchell was talented not only in acting but he showed much ability in the field of drawing and painting. In 1904 to 1905 he attended the John Herron Art institute in Indianapolis, where he came in contact with many interesting artists; among his associates were Raymond Adams, Worth Graham, and Hanlen Booth. In 1905 special recognition was given him for composition, uniqueness of color, and technique in charcoal studies.

At De Pauw university, Mitchell was prominent in dramatic activities. He acted and doubled as stage manager in many of the early productions at this institution.

After receiving his degree from De Pauw he went on to the University of Michigan where he worked his way through by waiting tables at the Oyster Bay Cafe, and was first assistant to the family coachman of the regent. During his stay at the University of Michigan he met the ex-minister from Bavaria. It was then that he decided to prepare for the consulate service. However, he discarded this idea and in 1912 he received his masters with a major in speech and political science, and a minor in economy.

### Was at MSC

After completing his education he went to work for the A. M. Fray Seed company. Mitchell was then offered a job at Alma College which at first he refused and later accepted. From this position he moved to Michigan State College where he remained until 1918, as an assistant professor. He then took a job with the J. Walter Thompson Advertising Agency. At the termination of his stay with this firm he returned to Michigan State College as an associate professor. It was at this institution that he introduced community drama and rural recreation.

"THE enclosed picture of what looks like a Sunday school picnic is to show the world that some college graduates average over 1 1/2 children apiece. The three mothers are Mary Stevenson Boesch, '34; Mabel Sandoz Jacquot, '35; Margaret Stevenson Sandoz, '38. The 10 children range in age from Joe Sandoz at three weeks (in picture taken last year) to Linda Jacquot at 10 years. There are five Jacquots, three Boeschens and two Sandoz'. Five of the six parents are Oregon State graduates."—Margaret Stevenson Sandoz.

He came to Oregon State College in 1920 at the request of Dean Ellwood Smith, who wanted him to organize the speech department. Dean Smith believed that this college needed a well organized speech department, and he felt that Professor C. B. Mitchell was the man best able to coordinate this department.

### Few Facilities

The department started with a three man staff, and had its headquarters in an office on the third floor of the library. In 1920 there were virtually no facilities for dramatics. Rehearsals were held in classrooms, and the productions were given in the old women's gym (since remodeled into the Playhouse), Shepard Hall, the YMCA Hut (no longer on campus), or the Majestic Theater (now the Varsity Theater) down town.

From this modest beginning Professor Mitchell has expanded his department to twelve staff members, who have their offices

in Shepard Hall. The college now has its own playhouse, where rehearsals are held and productions given. The Speech Department now offers a wide variety of courses, such as dramatics, forensics, radio speech, extempore speech, and speech correction.

In 1923 Professor Mitchell was instrumental in organizing a local chapter of National Collegiate Players, honorary dramatics fraternity.

Professor Mitchell's outstanding ability and industry is shown in the number of honoraries of which he is a member. Prof. Mitchell may also be found in *Who's Who in Oregon*, *Who's Who on the Pacific Coast*, *Who's Who in American Education*, *Who's Who in America*.

## Dr. Fred F. McKenzie

Dr. Fred F. McKenzie, chairman of the animal husbandry department and one of the leading men in his profession, is now in Australia on a Fulbright fellowship.

Dr. McKenzie is helping establish a department of animal husbandry in the New England University college in New South Wales. He will also give a series of lectures at the University of Queensland. His assignment includes visits to many livestock ranches, and the agricultural research centers of Australia.

### Leading Authority

Dr. McKenzie has been highly instrumental in developing the animal husbandry department of Oregon State college since his appointment as chairman of the department in March, 1947. He is also one of the world's leading authorities on artificial insemination.

He is a graduate of the University of British Columbia's first class in agriculture in 1921, and his biography reads like that of a diplomat in the foreign service.

Dr. McKenzie, who was reared on his father's farm on Lulu Island, B. C., Can-

# Forester Gets New Position

Boyd L. Rasmussen, '35, former supervisor of the Siuslaw national forest, was recently promoted to the position of assistant

chief, division of fire control, in the Washington, D. C., office of the U. S. forest service.

Rasmussen received an appointment as forester in 1935 and was assigned to the Pacific Northwest forest and range experiment station and was placed in charge of cruising 7,000 acres of timber in the Blue Mountains experimental forest in eastern Oregon. Later he had charge of a 50 man emergency relief administration camp, worked in various capacities on the Mt. Hood, Willamette, Siskiyou, and Umatilla national forests in Oregon and the Mt. Baker in Washington. He took over his Siuslaw duties as assistant supervisor in 1946 and was promoted as supervisor in 1950.

He is a member of the society of American Foresters and is affiliated with Beta Theta Pi fraternity and the Masonic Order.

Rex Wakefield, '42, has succeeded Rasmussen. He was staff assistant on the Willamette national forest. He is a member of the professional Society of American Foresters and affiliated with the Masonic Order and the International Toastmasters Club.

ada, went to the University of Missouri for post graduate work. There he received his A.M. degree in 1923 and Ph.D. in 1925.

## At Missouri

During the years from 1923 to 1941, Dr. McKenzie was based in Columbia, Missouri, on a cooperative appointment with the United States department of agriculture and the University of Missouri. His special field of research became the development of techniques in extending the use of sires for livestock mass improvement through artificial insemination.

Meantime, he became something of a world traveler, his work taking him to the International College at Izmir, Turkey, in 1927-28, on a tour of Europe in the '30's" to the Royal Veterinary college in Stockholm, Sweden, and to Cambridge university, England, in 1937.

In 1941, Dr. McKenzie moved to Logan, Utah, to head the animal husbandry department at Utah State Agricultural college, and in 1944 he joined the OSC staff. It was during these years that he became a familiar figure in several South American countries including Peru, Chile, and Uruguay.

## "A True Scientist"

Describing the visit of "this truly great scientist and world authority in physiology and artificial insemination," El Campesino, official organ of the National Agriculture society, Santiago, Chile, said, "The United States could not have sent a more perfect scientific representative, for he is a man of science in the strictest sense of the term, and a gentleman also in the strict meaning of the world."

Since Dr. McKenzie came to OSC, he has participated in annual meetings of the stock growers held in Oregon. He is now a member of the board of directors of the Oregon Cattlemen's Association.

In the animal husbandry department he instigated the development of a research program which was initiated in July, 1947. He belongs to a myriad of social and scientific clubs and organizations. He is listed in Who's Who in America. Corvallis residents know him through his activity in the Federated Church of Corvallis, and as chairman of the committee on International Educational Exchange.

The state board of higher education in its June 17 meeting authorized final plans for a women's cooperative house, called Azalea House. The state extension women have raised about \$45,000 for the project. Azalea House will be constructed on the eastern end of lower campus.

A sum of \$111,000 will also be used to convert a section of the men's gymnasium into a filter system for swimming pools and to renovate shower rooms.

# Hawaiian News

At its May meeting the Honolulu Alumni Club made a professional tape recording to send to KOAC for broadcasting. Aimed at Staters everywhere, the half-hour recording tells other members of the OSC family what goes among alumni in the "Paradise of the Pacific."

The broadcast consists of three parts: A typical opening from the popular "Hawaii Calls" radio program; short talks by Honolulu alumni and former OSC coach Paul J. Schissler; and a final section of Hawaiian music from Waikiki.

Webley Edwards, '25, host on the weekly "Hawaii Calls" program and host for the alumni club at the May meeting, set up recording equipment in the living room of his home in Kahala, on the sunrise side of Diamond Head. "What we got from books in college," Edwards told his radio audience, "was important. What the profs at Oregon State taught us was important, too. But equally important are friendships that have endured through the years."

## Treasury in Black

Henry Hughes, '33, president of the Honolulu club, sent greetings to President Strand and reviewed the activities of a very active group. Mark Briggs, '33, former club president, recalled that the old campus in Corvallis still has fond memories in the hearts of alumni. June McCallister, '47, club secretary-treasurer, reported that the dinner meeting had come out 25 cents in the black.

Edwards had to raise the microphone two feet to accommodate Ade Schwamel, '33, who sent greetings to his hundreds of Stater friends. Lt. Colonel Kenneth Munford, '34, club publicity chairman, reported to Alumni Secretary Bob Knoll and Stater Editor Ted H. Carlson that the Honolulu club had enthusiastically accepted the idea that in one issue next year the *Oregon Stater* feature OSC alumni in Hawaii and Hawaiian students on the campus.

Coach Schissler, who with Mrs. Schissler is visiting in Hawaii, sent warm personal greetings to the coaching staff at OSC and promised to send along talent for future teams. At the present time, Schissler is director of special events for the Los Angeles Times, and in that capacity assists in sponsoring the annual Pro Bowl game.

## Former Coach Reminisces

In the get-together which preceded the recording Schissler reminisced over the "good old days" when Oregon State took a 31-man football squad—half of them sick with the flu—to the East coast where they got up from their sick beds to whip the top-ranking New York University "Violets."

Those who hear the broadcast on the mainland will miss one glamorous part of the show: Eddy Auld, '31, doing a male hula to the accompaniment of the recorded music from Waikiki.

Newest member of the Honolulu club is Mrs. Norman Poole (Marolyn Ribgy, '50) who came to the Islands in March to marry Lt. Poole, '50, in a colorful ceremony at Hickam Air Force Base.

Sixteen OSC coeds, one from Mills College, and one from San Jose State, left the U. S. Sunday, June 22, by Pan American plane for Honolulu and a six week course at the University of Hawaii summer school.

The coeds won't be too hampered by books and studies. Oregon State alumni were scheduled to provide much entertainment for the mainlanders. While in Hawaii the Moana hotel bungalows will house the girls.

# GIFTS FOR OREGON STATERS!

## Records

Get your album of Oregon State College music! It's called "Within a Vale of Western Mountains" and it contains such songs as OSC Medley, Toast to the Team, Hail to OSC, Mighty Beavers, and the Alma Mater, along with several other special numbers. The OSC band and glee club recorded the music and the records were pressed by RCA-Victor on unbreakable vinylite-filled compound. The album is available in either three records of 78 rpm or one 33 $\frac{1}{3}$  rpm long-play record. The price postpaid is \$5.50 for the 78 rpm and \$4.75 for the 33 $\frac{1}{3}$  rpm. Order your albums now through the OSC alumni office, 103 M.U. building, Corvallis.
