Dr. Donald K. Erb, President
University of Oregon

Dr. F. A. Gilfillan, Acting President
Oregon State College

Gentlemen:

President Robert Gordon Sproul has confronted in practical and realistic fashion the problem of the American-born Japanese students, of whom he has many in the California institutions.

His letter to Honorable John H. Tolan, Chairman of the special committee investigating the evacuation of aliens, with the attached statement, outlines his conception of a proper attack upon this problem. I am submitting it to you for your casual comment. Would you read the documents and reply to this letter with any suggestions or comments you may have in mind? I should appreciate having your reply by Friday morning.

Would you also be good enough to let me know the approximate number of these Japanese-American students in your institution as of this year?

Cordially,

Frederick R. Huntr
Chancellor
